◊

Welcome to the brand new Macintosh application for creating standalone documents.   Pageboy™ creates colorful, exciting, electronic magazines that run on EVERY Macintosh.   Here are just a few of the things you can do with Pageboy...

• Create Newsletters

• Electronic Magazines

• Portfolio/Resumes

• Documentation

• Readme Files

Features You Deserve◊

• Styled Text, including COLOR

• Multiple Pages and Custom Page Colors

• Hot Pictures with Click Actions

• Sound and Sticky Notes

• Creates ultra-compact Standalone Documents

• Runs on all Mac Systems, System 6 or later

Easy to Use

Imagine creating your own eZine, this easily- Type or paste in text.   Paste pictures from the clipboard.   Build Standalone and distribute!   Pageboy 'eZines' are Self-Running, no need to distribute an application or viewer with your magazine, just double-click!   And, Pageboy creates the smallest documents around, less than 40K overhead!

Pageboy is Shareware! Please give Pageboy a try: Create your own newsletter. When ready to distribute, send $20 for your Shareware Registration Code.   This one-time fee allows you to create and distribute as many documents as you wish.
