All Macintosh users should feel free to contact me for any of the following reasons: reporting bugs or suggestions about Shutdown FX or any other program I've written; requesting a list of other programs I've written; requesting a copy of the GNU General Public License; discussing the possibility of collaborating on future programming projects; discussing the virus I wrote and released (MBDF-A); discussing ways to keep potential virus-writers from becoming actual virus-writers; discussing techniques for really good backrubs.

My e-mail address is f8dy@netaxs.com.   To send me e-mail anonymously, mail to an48382@anon.penet.fi.   (Due to the double-blind system, you will be allocated an anonymous I.D. which will keep your identity hidden.)   To send me encrypted mail, e-mail me requesting my PGP 2.3 public key.   If you do not have e-mail access, my home address is 1130 Radnor Hill Road, Wayne PA, 19087-2203, USA.   Obviously, it will take me much longer to reply to snail-mail; use it as a last resort.

You can finger f8dy@netaxs.com for a complete program list.   I update this list every time I release a new program.
