1.5 Shoah Distributors

```
 | \* __-+-._.*|_ . .-+- _ ._. __
 |__/_|_ ) | [ |[_] (_| | (_) [ _]
 -----
```

All Shoah software is available from the following companies:-

SeaSoft Computing

Arrow PD

Future PD

Hornesoft PD

Saddletramps PD

Shoah Licenseware is ONLY available from these companies, ←
and is NOT

available direct from SHOAH.

Shoah Freeware is usually available from these companies first, but can also be obtained from all other good PD companies.

Any company interested in becoming an offical SHOAH distributor, should contact

Squize
for details.

```

The BEST map editor available for all you game/demo writers out there. Some of the features... Cut/copy/paste, multiple save/load formats, palette editor, highly configurable (Even includes a screen blanker), attribute control (Both local and global), multitasking, etc., and best of all, its a real dream to use.

This utility has been tested on most configurations, and works problem free. AGA support is currently limited to 64 colour screens.

A special version of GRIME featured on the coverdisk of the April 1996 Issue of Amiga Shopper.

Price - £4.99

What the reviewers say....

"GRIME is an easy-to-use map editor..."

"The interface is well thought out, meaning that getting to grips with operations is straightforward."

"GRIME could be the answer to many programmers' prayers."

Amiga Computing Febuary '95.

"Wow. AMOS programs are back with a vengeance this month."

"This is a really comprehensive piece of software."

"At £5, I think this is ideal for home games programmers."

94% Star buy

Amiga Shopper Xmas '95.

Demo availble on Aminet at : dev/misc/Grime_v12.lha

1.8 Lottery Winner Pro

Lottery Winner Pro V3 - By Paul Morley

What can I say ? This is THE lottery prediction program. It features a great and easy to use interface, Hot/Cold number prediction, Wheel system (And Wheel editor) with future wheel disks coming soon, Zodiac prediction and a whole lot more (Including FULL technical support from the author).

This really is the dogs privates, and just to prove it one lucky user (Of an OLDER version) has recently won two grand ! The author himself has won seven times to date ! (How many times have you even won a tenner ?).

Price - £5.00

What the reviewers say....

"Another lottery predictor ? And they want a fiver for it ? Mind you, how much do you spend on the lottery every week ? You might as well spend a little on some 'help'."

"This is a pretty extensive predictor with a variety of methods available..."

80%

Amiga Shopper Xmas '95.

"...it looks good and is easy to use."

88%

Amiga Shopper October 1996 (Issue 67).

1.9 Smart CardZ

Smart CardZ - by Paul Morley

Don't have AGA ? Or you have AGA but no Hardisk ? I bet you've seen Klondike Deluxe AGA on a mates computer, or read a review ? Why oh why isn't there a version for you ?

Well as luck would have it, there is. And it's brilliant ! This uses converted Klondike cardsets (From 256-->16 colours) and looks really stunning.

There's not much really to say, if you want THE Klondike game for your computer then get this. (Please note, this is a MAJOR update from the PD version, CardZ, and we all know how good that is ! Also the PD version is no longer supported with cardsets, only this new version.)

Price - £3.99

What the reviewers say....

"All you non-AGA users need slobber and slaver over Klondike AGA card sets no more as Smart Cardz is here to save the day."

"Smart Cardz is a good, well-written program..."

86%

Amiga Shopper October 1996 (Issue 67).

1.10 LightSpeed

LightSpeed - By Sublime Software

From the authors of the excellent 'Last Lap' comes THE Tron based game.

This ISN'T yet another lightcycles clone, this introduces a totally new element to the genre (Tag !), and has a load more features, such as scrolling, split screen two player action, loads of levels and the great presentation that you'd expect from Sublime. Look out for this, you'll cream your pants !

Price - £4.99 (2 Disks, AGA Only)

Demo availble on Aminet at : game/demo/shh-lsde.lha

1.11 Last Lap II

Last Lap II - By Sublime Software

Better than you could ever imagine...

1.12 Shoah Disk Magazine Engine

Shoah Disk Magazine Engine - By Squize /SHOAH

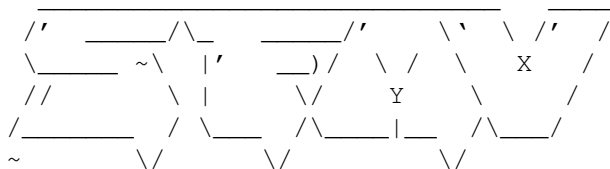

Create you very own disk magazines, with this HIGHLY customizable magazine creator. Includes all the editors and setup programs needed to create a disk magazine with ease.

As used to create

Dreamland

1.13 Shoah Full Motion Video

Shoah Full Motion Video - By Vex /SHOAH, Squize /SHOAH, Stephen /Sublime Software

Shoah Full Motion Video (SFMV) is a new animation format for the Amiga. It is specifically designed for playing full screen animations. It uses larger than normal pixels thus allowing for a full screen display.

SFMV consists of a conversion program to convert your own IFF Animations into the SFMV format, and a high speed player for playing the SFMV animations back. Also included is an animation utility for reducing and adding effects to your animations, and a script generating program for the player. Full comprehensive documentation is provided and example animations.

Available on Aminet at : gfx/misc/sfmv.lha

1.14 Dreamland

Dreamland - By Squize /SHOAH, Vex /Shoah

Our very own UFO diskmag. This magazine has been created using the

Shoah Disk Magazine Engine

, which will eventually be made available to the public!

Dreamland is AGA only.

Issue One was released in July 1996

Available on Aminet at : demo/mag/dreamland_1.lha
docs/mags/shh-dl1.lha

Issue Two was released in August 1996

Available on Aminet at : demo/mag/dreamland_2.lha
docs/mags/shh-dl2.lha

1.15 GRIME Viewer

GRIME Viewer - By Vex /SHOAH

An OS friendly map viewer, allowing you to view all your GRIME maps without having to load

GRIME

.

Includes displaying with or without graphics, and automatic scrolling.

1.16 Torque - Demo Version

Torque Demo - By Squize /SHOAH, Vex /Shoah

A fast paced shoot'em up, in the style of the 64 classic 'Uridium'. Stunning graphics, high speed scrolling. Can you meet the challenge?

What the reviewers say....

"Based on Uridium, this is a horizontal shoot'em up of the highest order"

"For mindless destruction, this is the place to look"

91%
CU Amiga June '96.

"Thanks to Shoah it's now possible to relive Uridium on your Amiga"
"With pleasing graphics and some nice sound effects, Torque is as"
"slick as it is addictive."

Amiga Format July '97.

Available on Aminet at : game/demo/torque_demo.lha

The
full version
will soon be available.

1.17 WordMania

WordMania - By Vex /SHOAH

WordMania is a program designed to find anagrams and perform pattern matching functions on a dictionary of words. WordMania is quite capable of solving many popular word puzzles.

Features include :-

- o Anagram searching.
- o Full pattern matching.
- o Fast dictionary searching.
- o Lots of criteria options.
- o All lists can be saved.
- o Full user preferences.
- o ASCII dictionary support.

Available on Aminet at : text/misc/wordmania.lha

1.18 Six Little Numbers

Six Little Numbers - By Vex /SHOAH

A very simple little program that generates six random numbers between 0 and 50. As you might have guessed it's for doing the national lottery (British one anyway).

1.19 GIF Examiner

GIF Examiner - By Vex /SHOAH

This is a simple little program. It displays the details of a GIF (Graphics Interchange Format) file, it doesn't display the picture, just the data. It just reads through the entire file and displays the contents of the blocks

and sub-blocks.

1.20 HTML Map Maker

HTML Map Maker - By Vex /SHOAH

This program is designed to generate HTML code for client-side image maps. Have you seen Web Pages that contain pictures that allow you to click on different areas to go to different links? Well, these pages are using image maps, some maps are server side and some are client side.

Creating the code for the client side maps can be a lot of hassles, especially if you've got a lot of links and you want the zones to be pixel perfect.

This is where the 'HTML Map Maker' comes in! It allows you to load in an image, and then select the areas that you want set up as hotzones and where you want them to point to. Then the program will generate the actually code for you.

1.21 Add Image Size

Add Image Size - By Vex /SHOAH

This program is designed to process the image elements (IMG) within a HTML document. It attempts to read the image file and then update the image element with the images width and height.

Once you've created a HTML document (or many documents for that matter) you can then use this program to look through the file(s) and insert all the sizing information into the image elements. This saves you the trouble of remembering/working out the sizes of all your images.

The image elements within a HTML document look something like this...

```
<IMG SRC="Logo.GIF" ALT="My Web Page">
```

After processing with AddImageSize, the image element would look something like this....

```
<IMG SRC="Logo.GIF" ALT="My Web Page" WIDTH=150 HEIGHT=90>
```

1.22 Torque - Full Version

Torque - By Squize /SHOAH, Vex /SHOAH

The

demo version
has already received rave reviews.

And they were for a one fleet demo ! The game engine has been vastly improved since the first demo release and now includes background animations. AGA only, and totally free...

1.23 Tuff Enough

Tuff Enough - by Paul Morley

A stunning Break Out clone, add your own backdrops etc. AGA only, and hot...

1.24 LightPoint Slideshows

LightPoint - by Paul Morley
