## 1.3 Introduction

Classes Guide By Stuart Kelly Copyright 1997 ©

FREWARE

This guide hopes to become a list of all the custom BOOPSI classes that are available for the Amiga. Most of the classes are located in the SYS:classes/ drawer which is added to the LIBS: assign in the startup-sequence.

Program specific classes are usually stored in the PROGDIR:classes/ or PROGDIR:libs/ directory. MUI, for example, stores it's classes in the MUI:Libs/ directory

Programs that have a lot of specific classes will get there own directory in Classes Guide. MUI:Libs/ is an example.

They provide a way of making BOOPSI classes portable like libraries. It saves the programmers having to re-write the same code over and over again.
