CD Player is a Compact Disc player/data base for Windows. This program should work with any CD player, but Windows drivers, and MSCDEX.EXE must be loaded first.

DISCLAIMER

This product is provided "AS IS" without warranties of any kind. The entire risk as to the results and performance of this program is assumed by you the user. Further more, I the author do not warranty, guarantee, or make any representations regarding the use of, or the result of the use of this program. I the author cannot accept responsibility for system damage, loss of profit or any other special, incidental, or consequential damages resulting from the use or inability to use this product. In other words, ***use this program at your own risk.***

INSTALLATION

To install CD Jammer copy CDJAMMER.EXE to a directory on your hard disk. Then copy the included *.VBX files to your "\WINDOWS\SYSTEM" directory. You will need VBRUN300.DLL (not included) and VBDB300.DLL which is now included with this installation.

Add the CDJAMMER.EXE to an program group and you're done!

FEATURES

Version 2.11 - Fixed track number counter that forgot to change as tracks played back to back. Replaced the control box as requested by many users. Added the ability to change the LED color.

Version 2.10 - Rewrote back-end database engine due to huge memory needs under VB Database engine. Rewrote display engine for digital display mode.

Version 2.02 - Fixed a rare database error. Included missing VBDB300.DLL and VBRUN300.DLL files. (sorry) Decreased performance hits to Windows when minimized.

Version 2.01 - Fixed a hard-to find shuffle play bug that killed the program at various times. Added "next track" functionality to shuffle play.

Version 2.0 - Added Disc Identification and Cataloging. The database should hold any size collection. One click access to tracks. Features still

under development - export/import of collection, printed reports.

Version 1.01 - Fixed a bug with the shuffle play that stopped at the end of the last track - even if the last track was first in the shuffle. Fixed a calculation of the starting and ending times for the tracks which began a tracks a second or so too early (at the end of the previous track). Implemented the means to identify albums (I **WILL** be adding disc identification and cataloging **soon!**)

With version 1.0 I added the features that I thought would provide the majority of people would use.

That's it right now....

March 28, 1994

I plan to add the following features as soon as I can:

- 1) Disc Collection Reporting - Both paper and on-demand display
- 2) Additional Disc Information - Purchase Price/Date/Location
- 3) Multi-play list (custom shuffle)
- 4) Other fun stuff

If you have any comments on the features you'd like to see in the next release...please send Internet email to mmarchuk@class.org. If you are on COMPUERVE send email to 73321,3606.

Please leave your email address so I may correspond with you.
Especially if you find (argh!!) BUGS!

Thanks and Have Fun !!
-Michael Marchuk
