MicroWerks Microlink Version 1.05

Thank you for examining Microwerks Microlink product. Version **1.05** is an attempt to bring a more professional and stable Communcation Package to the general public. We especially want to thank our registered users for having confidence in our product and waiting patiently for the new releases. We have included a number of enhancements and new features based on the comments we have received .

The main addition that 1.05 brings to the table beyond 1.04 is the external modem file called modems.dat. This is an ASCII file and is user configurable.

Due to legal obligations we are unable to provide certain functionality for unregistered users at this time. Because of this obligation we will grant a 30 day trial for registered users. If you are disatisfied with the product within 30 days of receiving it in the mail send it back and we will gladly refund your money.

Please keep those letters coming. Your feedback is important to us in determining the furture directions for our product.

We can be reached on our support BBS at 404-410-9358 or on our Compuserve account:

Stephen Leitner, 72510,1766.

The product can be registered on Compuserve on the GO SWREG forum ID 55.

Thanks.
