

## **Features to be added**

- \* Add more items on Signature Menu - ftp, divider, date, fax, address, etc ...
- \* Multiple signature setup
- \* Add short-cut keys
- \* Add customized glossary
- \* Customized Client menu
- \* Add framing feature in combination editor
- \* Add commonly used faces in news posting/E-mails?
- \* Disable "Illegal Function Call" termination
- \* Save its own window position
- \* Move SetUp menu to system menu

## Features

- ~ Toggle the always on the top option
- ~ Choose client by clicking/selection
- ~ Send single line signature - Name, E-Mail, Office Phone #, Home Phone #, WWW URL ...
- ~ Send multi-line user-defined signature/tag line/quotation
- ~ Customized menu for single line signature
- ~ Customized menu for multi-line signature
- ~ Save signature setup as default
- ~ Edit signature setup
- ~ Send text files
- ~ Add/remove file name in the menu
- ~ Launch program at any corner

## How to Use

- 1 Execute "TEXT SENDER"
- 2 Edit signature under menu **Signature|Edit** and save it under menu **Signature|Save** for the first time user or add text file name into menu **File** for future usage
- 3 Execute client application/program which will receive texts from TEXT SENDER
- 4 Choose Client: Click the listed client application (if on the menu) under menu **Client** or select unlisted client by choosing menu **Client|Select**. Menu **Client|Select** turns on link mode (mouse pointer turns into boxes). Choose client by clicking the box pointer on the desired window title bar
- 5 Put text cursor in the desired position of the chosen client application
- 6 Send predefined text/file to client by choosing the proper menu item under **Signature** menu or **File** menu
- 7 Okey-dokey!

## **Requirement**

MS-Window 3.1 or up and vbrun200.dll in your Window system directory

## **Installation**

- 1 Copy the executable file (TXTSEND.EXE) and this help file (TXTSEND.HLP) to a directory of your choosing. For example "C:\TXTSEND"
- 2 Make sure the file VBRUN200.DLL is in your Windows System directory (usually "C:\WINDOWS\SYSTEM").
- 3 While in Windows, run TXTSEND.EXE

**Limitation**

- The text size in combination editor is limited to 1200 bytes. Any text longer than that would be better in File Send feature
- Don't send big file
- Don't send non-text file

## **Introduction**

This program sends any user defined text/text file to about any application/program which supports text input or text editing. This will save a lot of typing works and add file insert function to feature limited application.

## Trick or Knack

### Short-Cut Editing:

You may still use Ctrl-C, Ctrl-X, Ctrl-V for copy, cut, paste in any edit box of this program. Steal someone's signature? Don't tell me!

### Hot-Key Feature in Program Manager:

- 1 Select the Text Sender program icon in the Program Manager with a single-click.
- 2 Select the Properties Item from the File Menu.
- 3 Move to the Shortcut Key field.
- 4 Press T. (or whatever key you like). The field will change to "CTRL + ALT + T"
- 5 Press OK.
- 6 You may launch TEXT SENDER anytime using shortcut key defined in step 4.

### Launch Text Sender at any Corner:

Add command line with 2 more capital letters will make **Text Sender** start on any corner. Lowercase does not work!

Upper-Left	txtsend.exe UL
Upper-Right	txtsend.exe UR
Lower-Left	txtsend.exe LL
Lower-Right	txtsend.exe LR

## My Other Freeware

**Pixel Characterizer** (pixch050.zip in cica)

Check it out for:

Lazy ASCII artists -

Convert any bitmap picture to ASCII text

Double-byte based non-English MS-Window users -

Convert any non-English text to ASCII banner for showing message to any dumb/text terminal users

## **Compatibility to Clients**

Those are from testing team of TEXT SENDER. It might not work for you with improper setup.

### **Compatible Clients:**

- + WinVn
- + Nx
- + Free Agent 0.38
- + Eudora V1.4.4 & V1.4
- + BeyondMail for Windows Release 2.0g/MHS - Internal E-mail system
- + Notepad
- + Word V6.0a
- + Netscape 1.0N - Mail Document
- + Trumpet News Reader
- + EWAN Terminal Emulator 1.05

### **InCompatible Clients:**

Netscape 1.0N - News Posting
