

WinExit : A short way to exit windows without problems !

Utility of this program

The utility of this little program may be strange for some people. But if you're using other shells than program manager (for example : Windock, dashboard), you can use this little program to exit windows.

When you'll exit windows whitout saving your datas, the winexit program will display a message box that will warn you.

To add this little program to you shell, refer to the documentation of your shell.

Installation

First you have to copy all the files in the directory of your choice, for example :
c:\windows\winexit\

Use your shell to add the icon (for example with program manager : File - New - program item).

You just have to double click on the icon to exit windows directly.

More features

You can personnalize your winexit by copying the file winexit.ini to you windows directory.

The first section :

[WinExit]

Exit=0

Allows you to set what you want to do when you double click on the winexit's icon.

Values: 0 = Simply exit from windows

1 = Restart windows

2 = Exit windows and Reboot you computer

The second section :

[Sound]

Wavfile=<complete path to a .WAV file>

Allows you to play a sound when you try to exit windows without saving your information in some applications.

You just have to write the complete path to a '.WAV' file. For example :

c:\windows\ding.wav

Shareware

This little program is a shareware, you can distribute it freely. If you want to see to code (written in C) you just have to mail me at the address :

mca@info.fundp.ac.be

or : infmemcar@cc.fundp.ac.be
