

Graph 1 Example

FILE: Graph1.cln

Introduction

This contains samples of the Column/Area/Line graph object displayed in different ways. This is by no means a definitive list of all the combinations that this graph object has, it is only a few suggestions. The samples are one layer 0 to 2.

Layer 0

This layer contains examples of mostly column graphs with various styles, overlaps and fills.

Layer 1

This layer contains examples of area graphs (and some combinations), Notice that just as Columns can be filled with a picture, so can area graphs.

Layer 2

This layer is mostly line-graphs and marker graphs.

Viewing a Layer

You may prefer to reduce the scaling until all the graphs are visible at the same time.

- ▶ Set the Layer to be viewed
- ▶ Select Scale on the Settings Menu
- ▶ Select Scale to Fit.

Copy a Graph

To use one of these graphs as a base for your own graph.

- ▶ Switch to Edit Mode
- ▶ Select the Graph Object to Copy
- ▶ Select Copy on the Edit Menu
- ▶ The whole object is copied
- ▶ Switch to your own worksheet
- ▶ Select Paste
- ▶ Move the object to where you want it and pipe it in.
