

Hierarchy Listbox Version 1.1

Thank you for your interest in hierlb.vbx. This is a Visual Basic Extension (VBX) for Visual Basic developers that will allow them to display pictures and/or text in a hierarchical fashion. The example below shows you what hierlb can do.

It is a real simple vbx to use. Three or four lines to add/insert entries in the listbox. Include with registration is Visual Basic source that created the demo you see. You can register the VBX using CompuServe's SWREG. The ID is 5130. Or you can send me \$55 and I will mail or e-mail you VBX, VB source, docs, etc.

Thanks,
Ralph Krausse
