## **Minimum Configuration:**

A IBM PC or compatible machine running Windows version 3.0 or greater, with VGA graphics. The AccuWare fonts are **not** designed to work with EGA or CGA graphic adaptors, or hardcopy printers.

## **AccuFonts Installation:**

### **Double click on the Windows Control panel Icon**

This action opens the control panel window.

### **Double click on the Fonts Icon to start the Fonts program.**

The Fonts program is used to add or remove fonts from Windows, it displays the currently installed fonts under Windows. To add the AccuFonts click on the **A**DD... button, then use the file selection dialog to locate the four font files on the floppy:

### **Click on the first font, then holding down the shift key, Click on remaining fonts to highlight all the fonts.**

Click on the **OK** button to add the fonts to your system. The font window will be re-displayed, and if you scroll through the installed fonts, the added fonts will be there.

To ensure the fonts were installed correctly, click on one of the AccuWare fonts to display a sample of it's typeface. If the Sample text is blank, then a problem with the installation has occurred.

This completes the installation process.
