Notes on ProGen for Windows Demonstration version 1.1

We hope you like ProGen!

Please distribute this demonstration version freely amongst your friends and colleagues.

ProGen represents a step forward in Genealogical Software. Use it to store information about the lives of ancestors in your Family Tree.

ProGen features:

Unlimited entry of Personal Records and Individual Events (Demo version limited to 30 records)

Unlimited user definable event types

Top quality reports on all types of printer

Complex data queries for specifying lists of records

GEDCOM compatibility for data transfer with other genealogical programs

(Disabled on demo version)

Direct file compatibility between Windows and Macintosh versions

Firstly, it is the first of its kind which was designed for a windows environment and the User Friendly standards of today's professional software applications. We hope you will agree that ProGen makes things easy for you. ProGen is an Award Winner on an international scale, winning the 'Young Software Designer of the Year' award, 1991. Since then it has been refined to be even better!

Secondly, it is a commercial product with customer support and promised upgrades. Registered users qualify for free upgrades up to (but not including) version 2.0. Order your copy of ProGen from GenSoft today!

Thirdly, because ProGen is a 'proper' Windows package, you have the ability to exchange data from ProGen with your other Windows packages, such as Word Processors and Spreadsheets.

ProGen for Windows can be ordered from:

GenSoft, 70 Nelson Rd., Ipswich, Suffolk, IP4 4DT, England.
Order enquiries: (0473) 724674

Please send a cheque/Postal Order for £59-95 made payable to GenSoft. ProGen is also available for the Apple Macintosh @£69-95

Non UK Orders

We will support you with upgrades and respond to enquiries by post.

Please add £10-00 to the above prices

(We can only accept money orders in U.K. Pounds Sterling)

Before you Start

You must type the command

SHARE

at the DOS prompt before starting Windows. (You may wish to add this command to the AUTOEXEC.BAT file so that it is done auomatically each time you start your computer.)

Installation

If you received the program on two HD floppy disks, use the Windows Installer program, otherwise see the instructions further down the page.

You must install the program using the installer program!

The program files are supplied in a compacted format. The installer expands and copies them to your hard disk.

To install the program:

Make sure you have Windows up and running.
Insert DISK1 into your disk drive.
Select Run... from the File menu of the Program Manager
Type A: INSTALL and press the Enter key
(assuming A: is the drive with the installation disk in it!)

The installer program will takes a short while to load. When it has done so, click on the INSTALL button and supply the installation directory name. (The program takes about 15 minutes to install on a standard 386DX 25MHz computer)

If you have received the program as one file called PROGEN11.ZIP

Insert the disk with the **PROGEN11.ZIP** file into your disk drive. Make a directory on your Hard Disk called **PGDEMO**

e.g. MD C:\PGDEMO

Change to the new directory

e.g. C:

CD \PGDEMO

Type the following command at the DOS prompt:

PKUNZIP -D A:\PROGEN11.ZIP

If you have already extracted the archive without the -D option, type PGSETUP from the PGDEMO directory to setup the files correctly before starting the program.

Make sure the **ACCUFONTS** are installed into your Windows system. See instructions in the **INSTALL.WRI** file, after installation.

After installation you should have these files on your Hard Disk:

Installation directory (e.g. C:\PROGEN)

PROGEN.EXE - The installer will automatically make an icon in the Program Manager for you. To start ProGen double-click on this icon.

TREE.DF1 - Example Family Tree Data File
KENNEDY.DF1 - Another example Data File
PROGEN.INF - Graphics information file
Windows initialisation file

PROGEN.PRF - Preferences file Help information file

DDEML.DLL - Dynamic Data Exchange Links manager

README.WRI - This file

INSTALL.WRI - Instructions on how to install the ACCUFONTS into

Windows (Do this before starting ProGen.)

Directory EXTERNAL

O7HELP.DLL - Help System Driver

Directory ACCUFONT - These fonts should be installed before you first start

using ProGen, otherwise windows may not be presented correctly within the program.

ACCUGEN.FON ACCUMON.FON ACCUSHI.FON INSTALL.WRI -

Instructions on how to install the ACCUFONTS into

Windows

GenSoft, 70 Nelson Rd., Ipswich, Suffolk, IP4 4DT, England. Order enquiries: (0473) 724674
