Place to Place (V95.1) provides data on the cost of living as indexed between approximately 300 cities (SMA's) nationwide. **The cost of living is given (2) ways - noncompensated for taxes and compensated for taxes.** The tax adjusted (compensated) cost of living reflects the impact of the local tax structures on the cost of living index. The program features a side by side quick analysis tool complete with an equivalent salary calculator and an in depth analysis tool which creates a side by side analysis of key budget items; such as: Housing, Utilities, State College Cost, Transportation, and Health Care, and other key data. Data produced by the analysis can be output in hard copy with a single push button action. This program is designed to help you understand the financial implications of a Relocation. Cost of living and tax structures can vary radically in from location to location. **Does an opportunity reflect a real earnings increase?** This program is designed to aid job seeker, personnel offices, search firms, Realtors and others involved in the relocation process.

Requires: DOS 5.x or higher, MS Windows 3.xx, 4Megs. Ram, 4 Megs of HD
