Using the EasyArt Finder

SmartSketch EasyArt Finder

The EasyArt Finder is designed as an index into SmartSketch's EasyArt library to help you find the specific piece of EasyArt you need. SmartSketch's EasyArt is organized into multi-page books that contain related images.

Here are the best ways to find EasyArt images in SmartSketch:

Browse the books in the EasyArt Finder

Each EasyArt book has a corresponding page in the EasyArt finder that has a brief description of the contents of the book and an alphabetical list of every image in the book. Simply click on the item you want to access; the EasyArt book will automatically be opened in SmartSketch. You can then simply drag the image out of the EasyArt book and into your drawing.

Keeping the EasyArt Finder Visible

Choose the Always On Top command from the Help menu to make the EasyArt Finder window float above the SmartSketch window, so that it will be accessible as you work and browse through EasyArt.

Searching by Name

You can also use the search button above to search for a specific piece of EasyArt by name. Simply type in the name of the piece that you want. A list of the EasyArt books that contain a piece that matches your description will then be shown, and you can quickly turn to the proper page in the EasyArt Finder. Then it's simply a matter of finding your piece in the list of items and clicking on it. The EasyArt book will be opened in SmartSketch.

Browsing the EasyArt

Sometimes it makes more sense to simply turn through the pages in the EasyArt book in SmartSketch than to search for EasyArt by name. Use either the EasyArt Finder or the Open as EasyArt command to open the EasyArt book, then use the tabs on the right edge of the book to page through the images.
