Type-Designer 2.0

Introduction

With Type-Designer you are able to design high-quality fonts in the Adobe Type 1 and TrueType format. Type-Designer is developed for people who
- want to design Type of high-quality,
- want to import EPS files for creating logo or special character fonts,
- want to retrieve TrueType or Type 1 outlines,
- want to convert Type 1 fonts into TrueType or vica versa,
- need special symbols, like mathematicians, chemists or multi-linguists,
- want to remap characters, i.e. to access special characters of a standard font,
- want to edit kerning pairs,
- want to improve the quality of existing fonts,
- just want to look how good fonts from various sources are,
- ...

Type-Designer is a fast, small and excellent utility for all kinds of font work.

The following statement about the Type 1 into TrueType conversion proves the excellence of Type-Designer:

> »Type-Designer is the only program available on the PC that correctly converts Type 1 fonts into TrueType. All other programs distort the original letterforms and lose the original hints, but TrueType fonts generated by Type-Designer are virtually indistinguishable from the original Type 1 designs – even at small sizes and low resolutions.
> The program is a major achievement. Everyone who is seriously interested in fonts will want it.«

System Requirements

You will need a 80286 compatible computer, Windows 3.1 and a mouse.
Also recommended are:
- a 80386 computer with Windows 3.1 running in enhanced mode for '386 PCs,
- a monitor-graphics card combination with a resolution of at least 800 * 600,

Type Face Samples

A free CommScript font is available in CompuServes DTPFORUM under PC FONTS as COMSC1.ZIP (Type 1) and COMSC2.ZIP (TrueType).

Installation and Start of Program

Just copy the three files TD.EXE, TD.HLP, BWCC.DLL and TDDISPL.FON into a subdirectory and add TD.EXE to a Program Managers group. Simply start by clicking on the TD-icon.

Restriction of demo version

The only restriction of this demo version is, that you are not able to save your work, but with the TEST button you are able to look at the achieved TrueType quality (Type 1 quality is comparable).
