

WARNING

The program file changes itself if you open it, so in order to avoid any mistake which can be done (though it's very difficult) it's better to keep a copy of the .ZIP file in a protected diskette.

Installation:

- 1) Open the file XLRUNNER.XLA from the directory you prefer, or even from the .ZIP file.
- 2) Enjoy the program

The program is auto-installing so the new tool which will appear into the shown toolbar, refers to the Excel path. So if you want to change the position of the file, you will have to delete the new tool and open a NEW VIRGIN copy of the program file.

The Set-up program will copy the file into the directory EXCEL, and you can find some problems only if your HD is write-protected. In this case you have to:

- 1 - Remove the write-protection from your HD or only from the partition where you installed MS Excel.**

- 2 - Re-open the file XLRUNNER.XLA from MS Excel.**

Disclaimer:

This program is copyright of Roberto Boschin, 1994. It is provided without warrantee of any sort. The author doesn't assume any responsibility in consequence of this package. This program is FreeWare, and can be used and distributed for non-commercial use without fee providing that:

- a) it is not altered without permission of the author;
- b) my name remains on the package at all times;
- d) no fee is ever charged for the distribution of the program; and
- e) the author doesn't assume any possible responsibility in consequence of this package.

If you want to use it for commercial purposes or have any questions about

these policies, do not hesitate to contact me. While I do not ask for money, I am eager to hear what people think of the program. I'm especially interested in hearing about any problems, incompatibilities, etc. that you might encounter with this program. But I'm also keen to hear if you just like it, too.
