RISK CALCULATOR 2.0

Copyright © 1994 Jamie Fairweather.

RISK CALCULATOR is an odds generating program that works through a number of iterations of simulated risk battles.

This limited first release does not feature the following implementations:

> Printing Results
> Changing Iterations and other options
> Showing the data

For more information, refer to the on-line documentation (RISKTXT.TXT) provided with this package.

For an upgrade as it becomes available, or for other information, you can contact me at jrf@admin.agad.cc.purdue.edu.

Files in the package:

RISKCALC.EXE	-	Program file.
RISKTXT.TXT	-	On-line help (documentation).
RISKCALC.WRI	-	This file.
VBRUN300.DLL	-	Visual Basic Dynamic-Link-Library

NOTE: RISK CALCULATOR is a freeware application. For distribution details, and copyright notices, see on-line manual (RISKTXT.TXT).
