#⁴ !⁵ !⁶ **Finished Decompiling**

Assuming there have been no errors, the source files have been placed in decomp.hpj and decomp.rtf in the current directory.

$₇ #₈ +₉ K₁₀ **Installed Printers**

This topic uses the example embedded window to display the list of currently installed printers. {ewl dlldemo, PrinterList, data}Some of these printers may be currently active and will be marked "active" by the control panel.   Other printers are marked "inactive".   The main dialog box can be used to change the active printer for a given port, but the default printer may not be made inactive.
