The button below installs a simple Word for Windows 6.0 (WinWord) macro that sends the active document as a fax using Delrina WinFax. The macro will be installed in a template of your choice (normally NORMAL.DOT), and optionally the macro can be added to the WinWord menu of your choice and/or the WinWord toolbar of your choice.

PLEASE NOTE: If you are reinstalling this macro over a previous version (using the same macro name), you should *not* add it again to the menu or toolbar! (The previous menu and toolbar entries will still work.)
