```
//
//  SAVEALL.WCM -- save all docs that need saving.
//  <rreiner@nexus.yorku.ca>  6 April 1992.
//
//  Named documents that have been modified are saved silently, overwriting
the previous
//  version on disk; unnamed documents that have been modified are saved
via the Save As
//  dialog, so that the user may supply a filename.
//
//  At macro termination, the user's context is exactly what it was at macro
invocation.
//
//  Suggestion: put this on your Button Bar, next to a Save or Save As...
button.
//
