Classic PIO Library: Product Compatibility Information

All Classic PIO Images are saved in TIFF 6.0 format (32-bit/24-bit with Alpha Channel).

Most popular graphics applications support TIFF files. However, not all current applications support this version of TIFF. If you have any questions regarding whether or not your software application supports TIFF 6.0 format, please contact that software manufacturer.

Below is a list of several popular applications. We have tried to indicate which programs currently support TIFF 6.0 file format.
