How to Use this E.Resource

Welcome to the e.Resource *for Exploring The Art & Technology of Web Design*. This e.Resource is designed to supplement the text and provide you with teaching tools to make your prep time shorter and enrich your classroom.

The following elements are included to aid in your instruction:

- **Course Outline and Sample Syllabi**
  In this section, you will find all the tools needed to successfully integrate this text into your course. Course syllabi for 11- and 16- week course lengths are provided. You should modify the syllabi and assignments to fit your class schedules and lengths accordingly.

- **PowerPoint Lecture Slides**
  The slides present an overview and the highlights of each chapter. The slides can be used in the classroom or by you to formulate course notes.

- **Chapter Questions and Answers**
  Answers to the "In Review" questions in the text

- **Exams**
  A resource of multiple choice questions for mid-term and final exams. Answer keys are also provided.

- **Additional Projects**
  This section contains additional projects that can be incorporated into the class.

We hope that you find this resource helpful. We strive to make the book and this resource as useful and effective as possible. Therefore, we welcome suggestions, comments, and updates. If you have suggestions from which you think others would benefit, please let us know and we will try to include them in the next revision.

To send us your suggestions, please contact the publisher at:
