

Using this software.

You need:

1. An IBM-compatible PC running Windows 3.0 or later.
2. A hard disk with 1.5 MB available space.
3. 4 MB RAM memory.

To install:

1. Copy all files to a directory on your hard disk.
2. From the Program Manager or File Manager of MS Windows 3.0 or later, RUN the file WINRUN.EXE or
3.
 - a. From the Windows SETUP program in the MAIN PROGRAM GROUP set up WINRUN.EXE as an application in the program group of your choice.
 - b. In its program group, highlight the "WINRUN" icon by clicking it ONCE.
 - c. Pull down the FILE menu and select "PROPERTIES."
 - d. Rename "WINRUN" to any name you wish (such as "LEADING"); this is necessary because several other Chatfield Software products will initially set up with the name "WINRUN"--and you will naturally want to be able to tell them apart.
