Oh, the sweet promise of a late summer breeze. The air heavy in the leaves and the sun slanting low over the garden. The neighborhood pool ringing with children's voices, absorbed in the moment . . . the children don't know or care that summer is coming to an end. They have right now. But we know, and we

look to the fall with a sigh of relief. Cooler temperatures, turning leaves, wool in the hands and soon, on the shoulders.

If you're like me, you work on woolly sweaters through the spring and summer months, anticipating that day when it's cool enough to don the finished object. As the summer of 2015 wanes and I look to the next season, I find myself changing more than my clothes. After this issue, I will be moving into a new position with Interweave and someone will be taking my place as editor. I'm excited to lead our knitting staff and to make the higher-level decisions that directly affect the magazines and patterns and products we create for you. I will still be very present and very involved with this magazine. I so appreciate your support and loyalty through the years.

Like a small project bag that only has room for essentials and your favorite current WIP, this last Fall issue collects my favorite things: classic outerwear designs, traditional shapes and methods, rich natural fibers, interesting stories, and a bit of whimsy in the photography. In addition to our favorite tools and traditions, this issue is all about what we love in British knitting—inspired in part by a conversation I had with the fiery and unstoppable Verity Britton (read about her on page 10) back in January of this year. We take a look at British yarns, sheep breeds, the history of the mills and makers, and people doing cool things with old techniques (such as Felicity Ford; see Ravelings, page 104).

I hope you enjoy the designs, the articles, and the promise of autumn in these pages. And I'll be seeing you.

INTERWEAVE KNITS Editor's 2015 pick

Get serious about your knitting with
addi Turbos & *Interweave Knits*

This Set Includes:

Eight 32" circular needles in sizes 3 (3.25 mm), 4 (3.5 mm), 5 (3.75 mm), 6 (4 mm), 7 (4.5 mm), 8 (5 mm), 9 (5.5 mm), 10 (6 mm), and a handy case with pockets for each needle. The case can be hung on a peg or clipped inside a binder.

It was fall a couple years ago when I traveled to Minneapolis as a guest judge for the knitting design competition *The Fiber Factor*. I worked with several yarn industry icons and the team from Skacel to choose a winner in a late-stage episode of the competition. It was a highly rewarding experience, and it came with an unexpected bonus. As a thank-you for participating, Skacel, which put on the program, offered its judges a choice of any of the company's yarns or needles. I chose addi Turbo Rocket fixed circular needles.

I'm a fast knitter, I use a lot of sticky wool, and I like to zoom—so nickel-plated metal needles are my preference. The addi Turbo Rockets have extra-pointy tips, and I'd been eyeing them—here was my chance! Skacel sent me ten sizes in the 24" (60 cm) length.

As we approached our Fall issue this year, my team wanted to put together an exclusive

kit for our readers, something that we can stand by as knitters ourselves.

We've partnered with Skacel to bring you the *Interweave Knits* Editor's Pick addi Turbo Rockets Circular Needle Set. I chose 32" (80 cm) lengths for this set, because I often found myself wishing that I had them, instead of 24". With 32" circular needles, you can knit a variety of sweater sizes, as well as any project worked flat—especially shawls, which we're fans of here at *Interweave Knits*.

Knit Faster!

Do you want to increase your knitting and purling speed? To some extent, speed takes practice, and to some extent, it's a matter of methods and tools. Get started here!

- 1 The no-brainer way to finish projects quickly is to start with big yarn and needles. Grab some size 15 (10 mm) needles and **Plymouth Yarn Galway Roving** and churn out hats, cowls, and even sweaters in record time. This 100% wool singles yarn comes in 3½ oz (100 g)/54 yard (49 m) skeins, in eighteen colors, both vivid and mellow. www.plymouthyarn.com
- 2 Continental knitting is widely considered to be the fastest method for both knitting and purling. Conquer the method with **Biggan Ryd-Dups**, using her videos *Continental Knitting* and *Knitting Colorwork Continental Style*, then follow along as she dispenses *Tips & Tricks for*

Faster Continental Knitting in her newest release. Find the DVD shown here at bit.ly/ContinentalKnitting.

- 3 The *Interweave Knits* 2015 Editor's Pick, **addi Turbo Rockets** are the ideal needles for fast knitting. Rockets are nickel-plated and have long, pointy tips, helping you find the hole in each stitch with high efficiency. This set includes eight 32" (80 cm) fixed circular needles in sizes 3–10 (3.25 mm–6.0 mm). Read more on page 3. Distributed by Skacel; Editor's Pick needle set available only at bit.ly/NeedleSet.
- 4 Another big-gauge yarn for quick knitting is the perfectly **British Rowan Purelife British Sheep Breeds Chunky Undyed**. Several iconic British breeds make this yarn—Black Welsh, Jacob, Bluefaced Leicester (learn about BFL on page 8), Shetland Moorit, Masham (read about Masham on page 10), and Suffolk are all here. As its name implies, the 3-ply yarn is not dyed and comes in five beautiful natural shades ranging from BFL white to Black Welsh charcoal. Distributed by Westminster Fibers. www.westminsterfibers.com
- 5 Sometimes we need a little more energy to stay focused and get moving. Fill the ceramic **Entwined Tall Mug** from **Knit Picks** with your favorite coffee, tea, hot chocolate, or other favorite drink to stay hydrated—and caffeinated!—and speed your way through projects. From Lederhosen to Turbos: *The Story of Skacel & addi Needles*

Nestled in the quaint hillside town of Altena, Germany, the *addi* needle factory is still run by the same family who began manufacturing needlework tools in 1829. Although technology and machinery have advanced greatly over the years, it still requires twenty-five steps and a considerable amount of hands-on fabrication to produce the high-quality, German-engineered needles knitters have come to love. *Addi* is now the sole full-line European needle producer, crafting its products under strict environmental regulations while also paying its employees a fair wage. *Skacel* has been working closely with *addi* since 1988 to bring these German products to knitters in North America.

The story of *Skacel* starts in 1957, with German-born Hans and Ingrid. The adventurous pair met in London, married, and set out for America soon after. They spent their earliest years in Florida, where Hans was the first stateside instructor for all things mechanical on the brand-new “people’s car,” the Volkswagen Beetle. Ingrid had two daughters, Susanne and Karin. During her spare time, she worked as a disc jockey for a German radio station.

In 1964, the entire family moved west to Portland, Oregon, home of Volkswagen’s Northwest Regional office. Hans spent the next twelve years moving up the corporate ladder while Ingrid started her own import business. She introduced America to copper kettles from the Netherlands, ski sweaters and fondue pots from Switzerland, and lederhosen from Germany. Knowing that America was where they wanted to stay, they became American citizens.

In the 1970s, Hans and Ingrid bought a Volkswagen dealership in Washington state. It was at this time that a marketing expert changed the Slavic pronunciation of the name “*Skacel*” to rhyme for the dealership’s newly coined slogan “excel with *Skacel*!”

After their daughters left the nest in the mid 1980s, Hans and Ingrid sold the dealership and returned to Germany for a visit. It wasn’t long before there was

news of grandchildren, and Ingrid began knitting in earnest. She discovered that Germany was well stocked with beautiful yarns that weren’t readily available in the United States. Thus, in 1987, Ingrid and Hans established *Skacel Collection, Inc.*, a distributorship for fine European yarns.

A year later, while on a buying trip to Germany, Ingrid discovered a lone pair of circular knitting needles in a shop. Because she had access to her mother’s incredibly large stash of needles back home, she did not purchase them. But that night, Ingrid dreamed of those same knitting needles flying through the air. Several days later, she followed her intuition and went back to the shop, hoping the needles would still be there. They were, and this was her sign to find the manufacturer.

After a few more days, Ingrid had her first meeting with Thomas Selter, the sixth-generation owner of *addi*. As a result of that meeting, Ingrid began to import the circular needles into the States. They were initially met with skepticism at trade shows, but Ingrid gave free mini lessons on how to knit in the round and sent shop owners home with a sample pair. They were instantly smitten with the newfound ease and speed of knitting in the round, and they loved the lightweight needles’ flexible cords, snag-free joins, and nickel-plated tips.

Getting just a few needles into shop owner’s hands had a snowball effect. The

addi needles took flight, this time not in a dream. As a matter of fact, after a shop owner told Hans that the needles sold off her shelves at “turbo” speed, the *addi* “Turbo” name was trademarked.

Ingrid and Hans have handed over the reins to their youngest daughter, Karin. Because she is an avid knitter and self-proclaimed fiber addict, it was a natural fit. “My parents established a company that values quality in all areas, from the precision of the products sold to the health and happiness of the employees. They established a tradition of attention to detail, generosity, and caring for our fiber community, a tradition that I honor and proudly carry forward,” says Karin Skacel.

British Royalty: 100% Bluefaced Leicester Yarns

The longwool Bluefaced Leicester (BFL) is one of the most well-known British sheep breeds and one of three established Leicester breeds, alongside the Border Leicester and English Leicester Longwool. BFL was developed in Northumberland, England, around the turn of the twentieth century as a result of breeding in favor of longer wool and higher-quality meat. The animals' faces are not actually blue! Rather, they appear blue in just the right light. Their off-white wool is crimped with small curls, has a fine diameter (24–28 microns), and sports a staple length of 3–6 inches (7.5–15 cm). Once it is spun into a yarn, most likely using the worsted method of spinning, the demi-luster (it has some luster) fiber takes dye very well, and when knitted up has incredible drape. Regardless of the project, 100% BFL is a dream to knit with—it's smooth and soft while retaining a woolly, animal character.

Back to Our Roots:

REVITALIZING THE WOOL COMMUNITY IN YORKSHIRE, ENGLAND

BY VICKY CARR

In an ordinary street in a suburb of Leeds, England, a quiet revolution is taking place.

The city is in the heart of the former textile manufacturing region of Yorkshire, once known around the world for its products. However, a century after that industry fell into rapid decline, there are signs that something is rising from the ashes and part of its former glory may be returning.

Knitting shop *baa ram ewe* is leading the charge. Set up in 2009 by Verity Britton, and now run with co-owner Jo Spreckley, its focus has always been on high-quality products made in Yorkshire, which attracted knitters' interest from the outset. Yet nobody could have predicted the results when it launched its own yarn, Titus.

"We thought we would make a little bit for the shop," says Verity. "We sent a few out to be reviewed here and there. We were amazed when it had the reception it did, particularly in the United States. We sold out immediately."

Made from a blend of Yorkshire's Wensleydale, along with Bluefaced Leicester and alpaca, Titus was created just a few miles from the shop by West Yorkshire Spinners. It is named after the philanthropist Sir Titus Salt, a leading figure in Yorkshire textiles, and each shade was named after a treasured aspect of Yorkshire life, such as Coal for the region's industrial heritage, and Goathland for the stunning heather found on the moors.

Titus's success prompted the small team at *baa ram ewe* to shift things up a gear:

Baa ram ewe co-owners Jo Spreckley and Verity Britton are not afraid to pose for a photo at the opening of their shop!

its second yarn, Dovestone DK, hit the market in August. This time, the company turned to Yorkshire's other main sheep, the Masham, for its wool. Masham wool is known for the beautiful ringlets of the fleece, but also a sturdiness coming from its hill-loving ancestors who lived in the surrounding dales.

Masham sheep are still celebrated each year in the town from which it takes its name. Every September, the Masham Sheep Fair fills the market square with stalls, displays, and activities that attract people from across Yorkshire and beyond.

Organizer Susan Cunliffe-Lister said: "The sheep fairs took place for centuries. Farmers from the hills used to bring sheep down to Masham to sell. It was a huge event up to the First World War, when it stopped. We started the Masham Sheep Fair again in 1986 and thought it would be nice to revive the old sheep fair in a slightly different form."

The original fairs were held to sell sheep, and more than 60,000 animals could change hands in just a few days. At its peak, sheep breeding was the main industry in Masham and its surroundings.

These days, the Masham Sheep Fair continues as a celebration of the area's heritage and the links it still has with sheep farming. Stalls are held by community groups, including the Women's Institute, Young Farmers, and local schools, and the events through-

out the two-day festival include woolcraft competitions, rewarding the best handspun yarns and items crafted from local wool.

Another annual celebration of Yorkshire's woolen history takes place at the Leeds Industrial Museum. Yorkshire Wool Week brings a series of special events to the building, focusing on the industry that made the region great.

Verity and her team have linked up with the organizers in previous years to offer workshops introducing knitting and crochet

Modern equipment in a traditional Yorkshire setting at Laxtons in Leeds.

to a new generation. With fun activities and demonstrations, they have shown that in addition to having a significant history in the area, Yorkshire wool has a strong future.

That strong local future informs baa ram ewe's practices in all of its work, and it is not the only firm to do so. The Masham wool used in Dovestone travels just over forty miles to be spun in Guiseley on the edge of Leeds by Laxtons, another firm with a long history in Yorkshire.

Established in 1907 in the county, in the second half of the twentieth century, Laxtons moved its manufacturing to mainland Europe. However, current owner James Laxton, the great-grandson of company founder George, has reversed that decision.

"In January 2010, we opened the first new worsted and fancy yarn spinning plant in the United Kingdom for more than a generation," he said. "We were facing increased transport costs in Europe. We were starting to see issues with quality. Also, the stability of the European market, in terms of production, was a concern—companies were going out of business on a reasonably regular basis in 2008 and 2009. To address all those issues, we decided to do our own manufacturing. We set about looking at how possible that would be—right in the middle of the worst recession of my life!"

It has been several decades since the Yorkshire wool industry was at its peak, and it seems unlikely that it will ever return to

those levels. However, there is an undeniable resurgence in interest in Yorkshire and its yarns, which means there is a new kind of industry developing: one that is all about the quality and the origins of the product.

"One hundred percent of our manufacturing is done here now," says James. "People have been very surprised by what we have done here. In the early days, a lot of people wanted to come here and see what we were doing." That kind of interest in product provenance has worked in Laxtons' favor, as has the focus on domestic materials. "We are utilizing a lot of British wool. All of what we do involves natural fiber, which is sustainable. We can produce everything in house, and it hardly travels at all."

In addition to spinning yarns for the likes of baa ram ewe, Laxtons produces yarns that are used for high-quality fabrics in apparel, for brands that include Louis Vuitton and Chanel. The company's strapline, Spun in Yorkshire, has proved attractive to customers, and as more people become aware of the importance of understanding the products they're using, it can only have more success.

Verity believes it is a growing trend. "Ten or fifteen years ago, it happened with food. People started to take an interest in where food was from," she says. "That's starting to happen with yarn." It is not just Yorkshire yarns that are enjoying a boom in popularity. In the last eighteen months, there has

been a growing enthusiasm for anything linked to Yorkshire, beginning when the Grand Départ of the Tour de France, the world's biggest cycling race, came to the region in July 2014. Baa ram ewe created the pattern for a miniature knitted cycling jersey that was to be turned into strings of bunting by Harrogate Council in Yorkshire. Hoping to receive perhaps 3,000 jerseys from enthusiastic knitters in the area, they were staggered when the project captured people's imaginations and brought in almost 30,000 jerseys from around the world.

The project was a memorable and proud moment in baa ram ewe's relatively short history, illustrating the firm's belief that knitting can help to bring people together—not just in Yorkshire but around the world—and create unexpected and striking results.

"We want to be at the heart of our community, not only through our products but also by getting involved in what's going on here," says Verity. "The yellow jerseys last year became so iconic and knitted the two things together, if you'll excuse the pun. It introduced a woolly aspect to the Tour de France. It brought people together."

She continues, "That's what is so fantastic about knitting."

NOTES

- The body and sleeves of this pullover are worked in the round from the bottom up to the yoke, then the pieces are joined for working the circular yoke.
- Slip stitches purlwise with yarn in back, except where indicated otherwise.
- In order to maintain a continuous cable around the yoke, the beginning of the round must sometimes shift to allow for cable crossings. This is achieved by slipping stitches at the beginning of the round and moving the marker to a new location. In order to shift it back to its original location, stop the round a few stitches early and move the marker again. Instructions in the pattern give specific information on shifting the beginning of round when it is necessary.

WORKING WITH CHAINETTE YARN

The yarn used in this pullover, HiKoo Kenzington, is a chainette constructed yarn, similar to an I-cord. Chainette yarns trap a lot of air within the strand, making for lofty, cozy fabrics. It may become compressed a bit in skein form, but will bloom beautifully with some encouragement. Try soaking the skeins or final garment in wool-wash, or steam it. The yarn gets even more full, round, and lofty, and the stitches soften and even out.

FINISHING

Graft underarm sts using Kitchener st.
Weave in ends. Block to measurements.

Originally from the Midwest, **Amanda Scheuzger** now lives in beautiful Maine, where she spends her free time knitting socks in preparation for the cold New England winter. Find Amanda online at www.handmaineknits.com.

YELLOW GOLD PULLOVER

Linda Marveng

Finished Size 34½ (37½, 39½, 43½, 48, 52)" bust circumference. Pullover shown measures 37½", modeled with 3½" of positive ease.

Yarn Jamieson's Shetland Spindrift (100% pure Shetland wool; 114 yd [105 m]/.88 oz [25 g]): #1160 scotch broom, 10 (11, 12, 14, 15, 17) skeins. Yarn distributed by Simply Shetland.

Needles Band—size 2½ (3 mm): 16" circular (cir). Body and sleeves—size 3 (3.25 mm): 16" and two 24" cir. Adjust needle size if necessary to obtain the correct gauge.

Notions Markers (m); removable m; 2 cable needles (cn); stitch holders; tapestry needle.

Gauge 23 sts and 32 rows = 4" in Welt patt on larger needle; 51 sts of back cable panel = 5½" wide on larger needle.

Crystal Buttons

Headband by Dorinda Balanecki

Materials list:

- US size 4 (3.5mm) needles or size to obtain gauge
- DK weight yarn -17 grams or approx. 60 yards
- 48 - 3mm Crystaletts Buttons, Fuchsia/Black Rhodium
- 8 - Citrine/Gold 5mm Crystaletts Buttons
- 3 - Crystaletts Pins Stitch Markers
- 3" piece of 22 - 24 gauge wire bent in half

Gauge: 30 sts x 40 rows = 4"/10cm over St st. Gauge is not critical as long as your fabric looks good. Subtract 2" from the head measurement for a negative ease and proper fit. Finished size 22" x 3"

SPECIAL NOTES:

- Headband can be shortened or lengthened by adding or removing rows at the first or last 21 rows of garter st or by changing the weight of the yarn.
- 3" piece of wire bent in half and pinched very tightly at the bend. This tool will allow you to have greater control to add the buttons to your headband.
- A video tutorial on how to make the wire tool can be found at www.crystalletts.com You can also send a self addressed stamped envelope to:

WONDERLAKE SHAWL

Amy Gunderson

Finished Size 66" wide and 31" tall.

Yarn Universal Yarn Deluxe Worsted (100% wool; 220 yd [201 m]/3½ oz [100 g]): #12505 rust heather, 7 skeins.

Needles Size 9 (5.5 mm): straight and 40" circular (cir). Adjust needle size if necessary to obtain the correct gauge.

Notions Markers (m); stitch holder; cable needle (cn); tapestry needle.

Gauge 16 sts and 21 rows = 4" in Lattice Lace patt; 16 rows of Border chart = 5¼" wide and 3" tall.

? See the Glossary on page 100 for terms you don't know. For our master glossary, visit KnittingDaily.com/glossary.

NOTES

- This shawl is worked from the bottom up. The lower cabled border is worked first, then the side cables are worked. Stitches are picked up along the straight edge of the border for the shawl body.
- When picking up stitches along the border, pick up under both legs of the chain-stitch selvedge so that the selvedge is turned to the right side and is visible.
- A circular needle is used to accommodate the large number of stitches.

PADDOCK CARDIGAN

Carol Feller

Finished Size 36 (39, 41½, 44½, 47½, 51¼)" bust circumference, buttoned. Cardigan shown measures 36", modeled with 1" of negative ease.

Yarn Green Mountain Spinnery Mountain Mohair (70% wool, 30% yearling mohair; 140 yd [128 m]/2 oz [58 g]): #7704 elderberry, 8 (9, 9, 10, 10, 11) skeins.

Needles Size 8 (5 mm): 40" circular (cir) and set of double-pointed (dnp). Adjust needle size if necessary to obtain the correct gauge.

Notions Markers (m); cable needle (cn); stitch holders; tapestry needle; seven 1" buttons.

Gauge 17 sts and 25 rows = 4" in St st.

? See the Glossary on page 100 for terms you don't know. For our master glossary, visit KnittingDaily.com/glossary.

NOTES

- The body of this cardigan is worked back and forth in one piece from the lower edge to the underarms. The sleeves are worked separately in the round, then the sleeves and body are joined to work the yoke.
- A circular needle is used to accommodate the large number of stitches.
- The stitch count in the Interwoven Cable chart is increased on Rows 1, 2, 5 and 6 and decreased on Rows 17 and 21. Stitch counts in pattern do not reflect these changes.
- You may find it helpful to use different colored markers for the chart placement on the back of the yoke. These markers are not counted when working the decrease rows for the yoke shaping.

Crafting a Creative Home

WITH CATHE HOLDEN

Cathe Holden is an artist, wife, and mother of three, who blended her long career in graphic design with her passion for vintage goods into a lifestyle rich with eclectic crafting. She creates, blogs, and teaches from her home studio, **Inspired Barn**, a mercantile-style workshop located in the Northern California countryside of Petaluma. On her blog, www.JustSomethingIMade.com, she shares original craft projects, free images and designs, and creative inspiration for makers of all skill levels. Together with F+W, Cathe has created an exciting video and kit series featuring unique multi-technique projects for creating beautiful home decor.

Here at *Interweave Knits*, we're fans of the rustic-modern aesthetic. Cathe's "Inspired-Barn" approach to decorating is one we think would work well for knitters who have studio space or knitting nooks in their homes. Try creating a series of wall hooks for displaying untwisted skeins or for hanging circular needles. You could use vintage knitting patterns or charts for the decoupage "ephemera," as Cathe refers to it, for either the wall hook piece or for the tray and coasters. What knitter doesn't need a set of trays for end-table catch-alls? Tapestry needles, stitch markers, tape measures, and other notions are always getting away from us—try capturing them near-at-hand in a custom mixed-media tray.

Round out your handmade world with these workshops and kits from Cathe Holden and send us pictures of your ideas and finished objects at knits@interweave.com. We would love to see how you incorporate knitting and mixed media to make functional, decorative items for your home.

Visit bit.ly/CatheHolden for the entire collection.

Wide Open Spaces

WITH ROMI HILL

*Rosemary (Romi) Hill is a beloved lace designer, and this fall she brings us a new collection of shawls, garments, and dreamy knits in her book *New Lace Knitting: Designs for Wide Open Spaces* (Interweave, 2015). As the manuscript for the book came together, Romi realized she had too many projects for it and offered three designs to the editors of Interweave Knits. We were thrilled to take the designs shown here for our Fall issue and thrilled to photograph them in the wide open spaces of Colorado's Front Range. We asked Romi some questions about the book and her work.*

CLINT HOLEMAN

What was your main objective with this book?

I am obsessed with the versatility of lace. People might think of it as frilly, but by changing the lace pattern, yarn used, and amount of lace in a piece, it can look elegant, sporty, or fashionable. In my book, I wanted to show the amazing range of possibilities. My music background led me to think of it as a theme with variations. I chose five traditional lace patterns that I really love, and my feeling was that, with different constructions, deconstructions, and weights of yarn, each lace pattern could support multiple designs that would hang together without looking repetitive.

Tell us about the designs that didn't make it into the book (the shawl and socks) . . . what is at work in them; what do you find successful about them?

The *Squall Line Shawl* is a cuddly oversized shawl incorporating the Wind-and-Shore stitch pattern (from the book) as a knitted-on edging. On this one, I explored how a heavier-weight yarn changes the nature of a lace stitch. The center triangle uses a lace pattern worked on both the front and back sides, but combining this potentially difficult patterning with a heavier yarn makes the stitch just fly off the needles. **PAGE 53 YARN** Malabrigo Yarn Merino Worsted

The *Purple Sage Socks* (both versions) incorporate a variation on the Twin Leaves pattern found in my book. For this one, I scaled down the leaves to make a perfectly sized panel for socks. There's a plain version with ribbing between the leaf panel and also a version with lace ribbing. My favorite part of these is the transition between foot and leg patterning. A traveling mini cable crosses above the heel and opens up into the back leaf lace panel. I completely geek out over that little detail! **PAGE 54 YARN** Sweet Fiber Yarns Cashmerino

GET THE BOOK

bit.ly/NewLace

Q What kinds of yarns do you like best for lace knitting?

A I adore luxurious fiber blends in particular. Right now I am really deeply loving knitting with singles of different weights and blends. They block out so beautifully and keep that gorgeous open lacy look without bouncing back, even in a heavier aran-weight yarn. I used several singles in my book: Artyarns Cashmere 1, MadelineTosh Dandelion, Zen Yarn Garden Serenity Silk Single, and The Fibre Company Terra from Kelbourne Woolens. The Malabrigo in the Squall Line Shawl (shown page 49) is also a singles and I absolutely love the way it drapes and holds its shape. For lace, you have to be really careful in choosing a 100% wool yarn since wool has so much memory. It often just bounces back from being blocked. So I'm also crazy for fiber blends that combine silk, bamboo or Tencel with wool. It's all about blocking the lace and having it stay blocked and pairing a fiber with no memory (and bonus! some lovely sheen) with springy wool that makes the finished project retain its lovely post-block shape.

Q Tell us about the open spaces that inspire your work.

A We live in the high desert at about 5,500 feet on the eastern slope of the Sierra Nevada. The gorgeous scenery, air quality, and wide open spaces here free my mind to wander. And whenever I hit a snag figuring out details or get anxious about deadlines, I go outside, take a walk or a kayak to the local lake, and remember how small and insignificant my problems are when compared to the wide world around me.

A FRESH, MODERN TAKE *on classic lace knitting!*

When it comes to stunning lace knitting, there are few names more synonymous with the craft than Romi Hill. Her designs have made by thousands of knitters and her latest creations in *New Lace Knitting* will have you racing for your needles and skeins of yarn to cast on beautiful, artful, sophisticated pieces. These 19 garment and accessory designs will reawaken your love of traditional lace knitting by using classic stitch patterns in fresh ways—whether you're creating shawls, cardigans, pullovers, or wraps. You may be familiar with knitting lace, but this is *New Lace Knitting!*

Using Slipped Stitches with Color, Cables & Shaping to Create Dramatic Surface Design

BY FAINA GOBERSTEIN

Slip-stitch master Faina Goberstein and her collaborator Simona Merchant-Dest bring us *The Art of Slip-Stitch Knitting* (Interweave, 2015) this fall. This new book features more than fifteen projects that use slip-stitch techniques to create unusual and contemporary fabrics. The book also offers more than forty stitch patterns and abundant how-to information. If you're a visual learner, you'll want to check out Faina's video workshop *Slip-Stitch Knitting*.

Faina designed the striking Bath Abbey Hat (page 61) for this issue of *Interweave Knits*. The hat uses slip-stitch colorwork, cables, and shaping to make a bold and modern design.

WHAT IS A SLIPPED STITCH?

We're all familiar with a stitch that is accidentally left undone in the previous row. The working yarn simply did not go through the loop and dropped in front of or behind the stitch. In other words, that stitch was slipped from one needle to another without being worked. We call that stitch a slipped stitch and the strand of yarn a float. When you look at slipped stitches from the wrong side (Figure 1), you can see the floats that cross behind them.

FORMING A SLIPPED STITCH

You can slip a stitch intentionally three ways: with the working yarn carried in front (wyf), with the working yarn carried in back (wyb), and with the working yarn carried on the needle (wyon). These terms refer to how you move the yarn from the right needle to the left needle as you slip the stitch—does the yarn pass in front or in back of that stitch?

How Wide and How High?

The length of a float is determined by how many stitches are consecutively slipped. The float can cross behind one stitch, three stitches, five stitches, and so forth. But there are practical limitations on the length of the float, including the effect on the yarn's tension. Floats that are pulled too tightly across the back (or front) of the work will cinch the fabric and distort the gauge. Floats that are too long tend to sag and look untidy—and they can snag on objects easily.

There are also limitations on how many rows the same stitch can be slipped. Each time you slip a stitch, it compresses the row gauge. Although the compression can be used to create interesting textures and effects, slipping the same stitch too many times may lead to dense and sometimes unattractive fabric. Much depends on the effect you're trying to achieve! Start with established stitch patterns and experiment from there.

Although slip-stitch textures worked in solid-color yarns are attractive and exciting, it is slip-stitch colorwork for which this technique is best known. By using two or more colors and basic knitting skills, you can achieve stunning fabric that gives the impression of requiring much more advanced skills and time-consuming work than it really does. Slip-stitch colorwork is easier to work than stranded (for example, Fair Isle) colorwork and can be worked in the round or in rows—no steeking required!

READING SLIP-STITCH CHARTS

Charts are a useful method of communicating stitch patterns, especially for slip-stitch colorwork. A chart is a representation of the right side of the work in the form of a grid filled with symbols that indicate how each stitch shown as a square is to be worked. Let's take a look at how to read the chart for Dunes (used in the Bath Abbey Hat, page 80) both when you work this pattern in the round and when you work it flat. The stitch key shows how to work each stitch both on the right side and the wrong side of the work. When working in rounds, every row is a right-side row.

Working Dunes in the Round

When you work in the round, as the Bath Abbey Hat is worked, you always read the chart rows from right to left. What makes slip-stitch charts unique is the way the slipped stitches are represented. You'll notice the first four stitches on Round 1 are knitted with B (red). The next four stitches are shown in white with V symbols. This means you slip those stitches, carrying the working red yarn in back of the work. Because those slipped stitches were worked in A (gray)

- with A, k on RS; p on WS
- with B, k on RS; p on WS
- with A, k on WS
- with B, k on WS
- sl 1 pwise wyb on RS; sl 1 pwise wyf on WS
- sl 1 pwise wyb on RS; sl 1 pwise wyf on WS

sl 2 A sts onto cn, hold in front, with A, k2, k2 from cn

Dunes in Rounds

12 st repeat

on the previous rounds, you are “pulling up” gray stitches into the red round. You would work these rounds as follows:

Rnds 1 and 2 *With red, k4, sl 4 wyb, k4; rep from * to end of rnd.

Working Dunes in Rows

When you work flat in rows, you read right-side rows right to left, but you read wrong-side rows left to right (backwards, essentially). Also, as you work wrong-side rows, you must invert symbols to achieve the correct stitch on the right side of the work. That is, you purl a stitch on the wrong side to create its inverse—a knit stitch—on the right side. The same goes for slip stitches. If the chart reads sl 1 wyb, but you are on a wrong-side row, you work the symbol as sl 1 wyf, so that the float stays on the wrong side of the work. Just as for the Dunes chart in the round,

Making a Neat Selvedge:

Slip the first stitch purlwise with yarn in front. Bring the previous color to the back between the needles.

Take the new color behind both needles and over the top of the old color. Drop the old color and begin knitting with new color.

Dunes in Rows

12 st repeat

you work with only one color per row, slipping the V stitches and “pulling up” the lighter stitches from the rows below.

WORKING WITH COLOR

One great advantage of slip-stitch patterns is that only one color is used throughout a row or round. Working with two colors in circular knitting allows for changing the color on any number of rounds; working with two colors in flat knitting requires an even number of rows between color changes. You need the even number of rows because you want to work the colors in multiples of right- and wrong-side rows, so the next color is always hanging ready at the same place (usually the beginning of right-side rows).

MANAGING THE COLOR CHANGE

It isn't easy to manage color changes at the edges neatly. If the colors swap frequently enough (every two rows), every second row you can carry the yarn up and hide it in a crease of a selvedge

stitch. To create a nice selvedge, work as shown at top right, page 66.

CABLING WITH SLIP STITCHES

The Bath Abbey Hat includes two types of cables. Normally, cables are worked with the help of a cable needle. In this pattern, two of the four stitches in the cable were previously slipped and therefore are more flexible. I recommend working slipped-stitch cables without a cable needle, because the cable needle is more likely to fall out of the loose stitches anyway. For tips on how to work cables without a cable needle, visit knittingdaily.com and search “cabling without a cable needle” to find multiple tutorials. Otherwise, these cables are worked just as for traditional crosses with one color because slip-stitch colorwork requires that only one color be worked at a time.

SHAPING IN SLIP-STITCH PATTERNS

Placing decreases or increases in slip-stitch patterns can be tricky. You need to

Crown Shaping

maintain the integrity of the stitch pattern and at the same time avoid unsightly holes. It's best to do all the shaping on rows in which you're not slipping stitches that are involved in a decrease or an increase.

In the Bath Abbey Hat, all crown decreases are strategically placed. On Rounds

3 and 4 of the chart, Stitches 1 and 2 were slipped. On Round 5, you would normally knit the stitches, so it's a good place to work k2tog without disturbing the pattern. If you work k2tog on Round 6 instead, you would run into a problem slipping the resulting stitch on the following round, Round 7. It won't look right.

Keeping all this in mind, you choose a rate of decrease based on what is good for the pattern. For example, making more decreases on Round 5 and the next set of decreases only on Round 17 made a lot of sense for the shape and the pattern of this hat.

The possibilities for working slip-stitch patterns are endless. Using modern yarns as well as gauge and stitch modifications lets an old technique manifest itself in fresh and stylish designs.

NOTES

- This pullover is worked back and forth in separate pieces and seamed. Sleeves with saddle shoulders are worked flat and sewn in.
- As sleeve stitches are increased, do not work added stitches into pattern. The underarm is stockinette stitch with a garter stitch selvedge.
- When shaping the sleeve saddle shoulder in the lace pattern, do not work a yarnover unless there are enough stitches to work its corresponding decrease.

NOTES

- This pullover is worked back and forth in separate pieces and seamed. Stitches for the sleeves are picked up around

the armhole and the sleeves are worked back and forth from the top down. Stitches for the shirttails are picked up from the wrong side of the garter ridge pattern at the base of the sweater and worked down.

- Keep one selvedge stitch at each end in stockinette stitch throughout.
- If there are not enough stitches in a cable or twist chart to work the cable cross, work these stitches in stockinette stitch.

2 (3, 4, 5) Stitch One-Row Buttonhole

Work to where you want the buttonhole to begin, bring yarn to front, slip one purlwise, bring yarn to back (**Figure 1**). *Slip one purlwise, pass first slipped stitch over second; repeat from * one (two, three, four) more time(s). Place last stitch back on left needle (**Figure 2**), turn. Cast on three (four, five, six) stitches as follows: *Insert right needle between the first and second stitches on left needle, draw up a loop, and place it on the left needle (**Figure 3**); repeat from * two (three, four, five) more times, turn. Bring yarn to back, slip first stitch on left needle onto right needle and pass last cast-on stitch over it (**Figure 4**), work to end of row.

Backward-Loop Cast-On

*Loop working yarn as shown and place it on needle backward (with right leg of loop in back of needle). Repeat from *.

I-Cord (Applied)

When attaching to an edge without live stitches: With double-pointed needle, cast on number of stitches directed in pattern. With right side of garment facing, *pick up and knit one stitch from edge, slide stitches to opposite end of double-pointed needle, knit to last two stitches, knit two together through the back loop; repeat from * for I-cord.

I-Cord Bind-Off

When there are live stitches or picked-up stitches on left needle: With right side facing, cast on number of stitches needed for I-cord (as directed in pattern) onto left needle. *Knit to last I-cord stitch (e.g., if working a two-stitch I-cord, knit one), knit two together through the back loops (**Figures 1 and 2**), and transfer all stitches from right needle to left needle (**Figure 3**). Repeat from * until required number of stitches has been bound off.

Kitchener Stitch (St st Grafting)

- Step 1:** Bring threaded needle through front stitch as if to purl and leave stitch on needle.
- Step 2:** Bring threaded needle through back stitch as if to knit and leave stitch on needle.
- Step 3:** Bring threaded needle through first front stitch as if to knit and slip this stitch off needle. Bring threaded needle through next front stitch as if to purl and leave stitch on needle.
- Step 4:** Bring threaded needle through first back stitch as if to purl (as illustrated), slip this stitch off, bring needle through next back stitch as if to knit, leave this stitch on needle.

Repeat Steps 3 and 4 until no stitches remain on needles.

Knitted Cast-On

Place slipknot on left needle if there are no established stitches. *With right needle, knit into first stitch (or slipknot) on left needle (**Figure 1**) and place new stitch onto left needle (**Figure 2**). Repeat from *, always knitting into last stitch made. For purl version, work as above, purling into each stitch instead of knitting.

Make 1 (M1) Increases

Left Slant (M1L) and Standard M1

With left needle tip, lift strand between needles from front to back (**Figure 1**). Knit lifted loop through the back (**Figure 2**).

Right Slant (M1R)

With left needle tip, lift strand between needles from back to front (**Figure 1**). Knit lifted loop through the front (**Figure 2**).

Purl (M1P)

For purl versions, work as above, purling lifted loop.

Provisional Cast-On

Place a loose slipknot on needle held in your right hand. Hold waste yarn next to slipknot and around left thumb; hold working yarn over left index finger. *Bring needle forward under waste yarn, over working yarn, grab a loop of working yarn (**Figure 1**), then bring needle to the front, over both yarns, and grab a second loop (**Figure 2**). Repeat from *. When you're ready to use the cast-on stitches, pick out waste yarn to expose live stitches.

Short-Rows (Knit Side)

Work to turning point, slip next stitch purlwise (**Figure 1**), bring the yarn to the front, then slip the same stitch back to the left needle (**Figure 2**), turn the work around and bring the yarn in position for the next stitch—one stitch has been wrapped and the yarn is correctly positioned to work the next stitch. When you come to a wrapped stitch on a subsequent knit row, hide the wrap by working it together with the wrapped stitch as follows: insert right needle tip under the wrap from the front; (**Figure 3**), then into the stitch on the needle, and work the stitch and its wrap together as a single stitch.

Short-Rows (Purl Side)

Work to the turning point, slip the next stitch purlwise to the right needle, bring the yarn to the back of the work (**Figure 1**), return the slipped stitch to the left needle, bring the yarn to the front between the needles (**Figure 2**), and turn the work so that the knit side is facing—one stitch has been wrapped and the yarn is correctly positioned to knit the next stitch. To hide the wrap on a subsequent purl row, work to the wrapped stitch, use the tip of the right needle to pick up the wrap from the back, place it on the left needle (**Figure 3**), then purl it together with the wrapped stitch.

Ssp (Single Decrease)

Holding yarn in front, slip two stitches knitwise one at a time onto right needle (**Figure 1**). Slip them back onto left needle and purl the two stitches together through back loops (**Figure 2**).

Sssk (Double Decrease)

Slip three stitches knitwise one at a time. Insert point of left needle into front of three slipped stitches and knit them together with right needle—three stitches reduced to one.

Having lived with the cacophony that is London for many years, I have recently made the move to a more rural setting in the Stroud Valleys in the southwest of England. Some changes were expected: more space to work in, friendly people, and a view that goes over rolling hills rather than hitting another brick wall. But it's the sounds I notice most.

I didn't expect the changes to my aural landscape. I thought it would be quiet, but the countryside is noisy. Not traffic or sirens, but the birds act like they own the place, chirping at all hours. And when it's windy, the trees sound like an orchestra tuning up. Instead of blocking it all out, I find myself paying more attention to the "backup band" that accompanies the rhythms of my writing and knitting.

I recently took part in a musical performance in Cardiff as part of a chorus of knitters, and that was what got me thinking about knitting and sound. Called *Killing Time*, the musical piece was composed by Jobina Tinnemans for the 2013 MATA Festival, which showcases emerging composers. The piece was inspired by field-recordings taken on the Pembrokeshire coast of Wales. Five knitters played in the ensemble, needles wired to play prerecorded snippets of sound as the needles touched. On one side of me was a flock of Arctic terns, and on the other, waves—as I literally knitted up a storm. The variable rhythms of the knitting randomly triggered the sounds, at the same time that the knitted fabric we made recorded the passage of time.

At my new studio in the hills, bad radio reception means that I've been listening more to podcasts, especially *Knitsonik* by Felicity Ford. Felicity is a knitting "sound detective" from the small industrial and commuting town of Reading, England. With a PhD in digital domestic soundscapes, she makes recordings of everyday sounds, some of which, like smells, are remarkably evocative of time and place. Her work involves recording textile activities in places where fiber is being spun or knitted—even the noise of the sheep in the fields. You might think that all sheep in their fields sound the same, but Lakeland breeds in Cumbria—a field of Herdwick sheep, for example—in addition to their own sounds, have a backdrop that includes the rugged, windy, watery landscape. In Estonia, where Felicity was invited for

a residency, that backdrop includes Nightingale thrushes, insects, and even wolves. Other sounds differ as well: Estonian spinners don't card their fleece, and their double-drive spinning wheels have a different intonation.

Having listened to the sounds the knitting customs create, Felicity also set out to find out what her own local knitting tradition would look and sound like, too. In her new book, *Knitsonik: Stranded Colourwork Sourcebook* (powered by Kickstarter), Felicity connects intimately with her immediate environment and finds much inspiration in its details. Rooted in Shetland's Fair Isle tradition as well as in Estonian colorwork, her designs are influenced by the colors, textures, and patterns that surround her. Sources include polychromatic brickwork, biscuit tins, fruitcake, and even the main road between Reading and Oxford. That road gave birth to #TarmacTuesday, to collectively document the many shades and colors of roads.

For projects throughout the book, Felicity uses Jamieson & Smith 2-ply Jumper Weight Shetland wool. The swatches are made in the round with steeks, as an introduction to steeking for those of us who have never dared. This book is an empowering, celebratory resource soon to be accompanied by the *Knitsonik* recordings.

Felicity suggests keeping a knitting diary to include the things that you like to listen to while you knit, perhaps things that accompany the rhythm of the knitting itself. My own environs have more resonance for me now, in a good way, though some sounds will be harmonious wherever I am: the sound of wine being poured, the crackling of a fire, and the gentle click of needles.
