Modifications and Corrections in CAD/DRAW 4

This text lists all major modifications that have been done since the initial release of TommySoftware® CAD/DRAW 4. Small bug fixes or performance increases happen all the time and will not explicitly be noted.

These modifications have mostly *not* been applied to the reference, so some methods described in the reference might be out-of-date as a faster or easier way exists now. Anyway, they will still be possible.

Version 4.01 (Release September, 1995)

• Some Windows 95 printer drivers refused to print. This was caused by a difference in printer handling between Windows NT and Windows 95.

Version 4.00 (Release September, 1995)

• Initial release
