

## Introduction

The object of Bomb Squad is to defuse a time bomb by correctly guessing its secret code before it explodes.

## Required Hardware and Software

'286, '386, '486, or Pentium computer running Windows 3.1.

## Installing the Program

In the MS-DOS shell, or with the Windows File Manager, create a subdirectory for the program. For example:

```
MKDIR C:\BOMB_SQ
```

Then copy all files from the distribution disk into the subdirectory. For example:

```
COPY A:\*.* C:\BOMB_SQ
```

The program is made up of the following files: BOMB\_SQ.EXE, BOMB\_SQ.HLP, and \*.WAV.

Using the Windows Program Manager, select the File menu and the New submenu. Then press the Program Group button and the OK button. Enter `Bomb Squad` in the Description field and press the OK button.

Select the File menu and the New submenu again. This time, press the Program Item button and the OK button. Enter `Bomb Squad` in the Description field, and enter the location of the program in the Command Line field, for example:

```
C:\BOMB_SQ\BOMB_SQ.EXE
```

Press the OK button.

Bomb Squad is now installed.

## Running Bomb Squad

After starting Bomb Squad, select the Help button with the mouse for further instructions.

## Distribution and Payment

Bomb Squad may be freely copied without cost, provided it is not changed in any way. If you find the program useful, please send \$7.50 to:
