

Acoustica 1.0 Demo README Notes

To add Acoustica to a group in the Program Manager, select New... under the Program Manager's file menu. Select *Program Item* in the displayed dialog box and click OK. A new dialog box appears. Specify the path where the ACOUSDEM.ZIP archive was unpacked and click OK.

NOTE:

Acoustica records directly to the hard disk. Hard disk volumes compressed using on-the-fly compression software should not be used to store Acoustica sound files. Change the temporary directory (found under Options | Directories) to a path on an uncompressed volume if Acoustica itself is located on a compress volume.

Files in the ACOUSDEM.ZIP archive :

ACOUS.EXE	-	Main Program file
ACOUS.HLP	-	Main Program Help file
PURCH.HLP	-	Purchasing Information
README.WRI	-	Release notes (this file)
BWCC.DLL	-	Custom Control Library
HALL1.REV	-	Reverb algorithm
HALL2.REV	-	Reverb algorithm
ROOM1.REV	-	Reverb algorithm
ROOM2.REV	-	Reverb algorithm
ROOM3.REV	-	Reverb algorithm
PLATE.REV	-	Reverb algorithm

The demo version of Acoustica is freely distributable as long as all files are distributed together in their original form.
