

Crystal's Crystmas Tree

Copyright © 1994 - Dr. Computer

Crystal's Crystmas Tree is for children aged 3 to 103. It was conceived and designed by my ten year old daughter, Crystal. Under her direction, I wrote the code to do exactly what she wanted, when she could not. Her two younger sister's and little brother stress tested the application. Having witnessed the ensuing competition for computer resources, I am certain this Christmas Activity will be as much fun for you and yours as it is for us.

Merry Christmas and Happy Holidays,

Jim Townsend

Installation:

This program requires Microsoft Windows. You can play Crystal's Crystmas Tree directly off the disk or you can put it in its own directory. The sound files will probably not play off your floppy drive, so if you want talking help, you must create a directory, copy the contents of the disk to the directory and then run the program. Have fun decorating the tree!

Crystal's Crystmas Tree is Shareware, which means you get to try it out before you purchase it. Please pass out copies for others to try out. Remember to support Shareware. There are very few other products around where you get to try it before you buy it. The concept won't survive if you don't support it. If you do use this program, exercise your Christmas Spirit, and send \$15. to Dr. Computer. Please call for more information on Dr. Computer's Software Products and Programming Services.
