

Lab 2: Integrals

Lab2.ma is a *Mathematica* notebook that demonstrates how to obtain and apply integrals of functions in *Mathematica*. It also shows how to derive the Wallis' formulae for the definite integral of powers of sines and cosines.

Like all *Mathematica* notebooks, this one is used by opening its cells and executing its *Mathematica* commands. To open a cell, double-click on its cell bracket. To execute a *Mathematica* command, click on its cell bracket to select it, and then press the Enter key (not the Return key).

Lab2.wn explains how to work through **Lab2.ma** on the NeXT.
