NEXTSTEP 3.2: Special Instructions
ÐÐÐÐÐÐÐÐÐÐÐÐÐÐ

We have provides in each of the program package directories an "NS_3.2" subdirectory which contains our software compiled on NEXTSTEP 3.2.

If   you are running only NS 3.2, you may want to install these versions instead of the QUAD FAT versions in the parent directory.

If you have a mixed network of NS 3.2, NS 3.3 and NS 4.0, you should install the QUAD FAT versions instead.
