How Old are Ya'

Version 4.0a

Installation

To install the program:

This program requires the Visual Basic Runtime Library <u>VBRUN300.DLL</u>. If you do not have this on your system, it is available through numerous libraries in Compuserve, America On Line and other On-Line Systems. This file should be placed somewhere in your PATH; usually in the WINDOWS\SYSTEM subdirectory.

Unzip the program file into the directory where you want the program located. The files <u>MSAFINX.DLL</u> and <u>MSMASKED.VBX</u> can remain in this directory or can be placed in the WINDOWS\SYSTEM subdirectory.

Add the HOWOLD.EXE file to a program group of your choice and your set to go.

The Help File for this program explains how to UNINSTALL the program.
