

# HyperCD

Version 4.003.94

A Windows 3.1, Chicago and NT CD Player.

(click icon for introduction\*)

I wanted a CD player that supported Windows 3.1, Chicago and NT was small, simple to use and always out of the way. I especially didn't want it to clutter up my desktop, the interface had to be small, so that it could be placed below iconised programs.

I also needed a CD player that had all the same contols of my home CD player plus a volume slider and eject button. It also had to stop and start in exactly the same spot every time, I wanted all these things and more .....I asked HyperDyne 2000 ...they wrote it for me and I thought I'd share it with you.

If you've got a suggestion, or you feel you'd just like to say thanks, drop me E-mail to my Compuserve address, **76702,1774**. Remember the latest version of HyperCD can always be found on Compuserve, just GO SOUNDBLASTER at any ! prompt.

This new version (V4.0) is totally re-written and now has a "remote control" look to it's interface.

Tips :

Ensure that HyperCD & HyperCD.WRI always remain in your Windows directory.

Always load the MCI CD Audio driver in Control Panel.

Make sure that a CD is loaded before you run HyperCD.

\*Only available if you have a Sound Blaster or compatible sound card.

Note :

**HyperCD** was written for **Creative Pacific** by the guys at **HyperDyne 2000 Software**, Australia's ultimate force in MultiMedia. HyperCD is not Public Domain nor is it Shareware, it can be used with our compliments however you may not edit it or change any part of it and this file must always accompany it. If you wish to include HyperCD in any shareware catalog or compilation you must get prior approval, failure to do so may contravene local and/or international copyright laws.
