designed for optimal fragging. Although the level is small, the rooms are multiply and redundantly connected so it seems larger than it really is and the action will always be fast and furious. No toxic waste or barrels, so suicide wussies have no choice but to duke it out 'till the end. This also means that there are no sniper's nests per se; be sure to watch your back! Other features are a unique central elevator shaft with four random lifts, as well as a cooperative exit which requires at least two players to operate. Happy fragging!! This modified version is optimized for altdeath! No BFG's but all other weapons are there. Secrets are not obvious.

SOULS.ARJ	20615	03-06-95	This is a really weird Dehacked 2.2 Doom][patch, but it's fun. It makes the Rocket Launcher shoot out invisible rockets which, cause no damage when they explode, but instead produce a Lost Soul. STAND.ARJ	22691	03-06-95	* "THE STAND" THIS WAD IS FOR DOOM 2 * This wad is based on HEADLONG.WAD but I made many improvements and I think you will find it's quite different. It's got (as far as I know) every weapon in the game and is intended for deathmatch with no monsters (only way to play!). I did add co-op starts and some monsters but I didn't spend much time on that. I took advantage of some of the new textures from Doom 2 such as the panelling and bookshelves. The exit is easy to reach and very visible because I expect in deathmatch it will make it easier for you. (why bother with co-op exits?
