EIMS Server Light 3.2.6 to 3.2.7 patch

Please check your Relay Security settings to make sure relaying is not allowed from any untrusted IP ranges. Detailed information on relay security is available at <http://www.eudora.co.nz/relay.html>.

Changes to EIMS Server 3.2.7

• Fixed APOP not working if NTLM or CRAM-MD5 had been tried on a POP3 connection
• Fixed IMAP LIST bug in EIMS 3.2 and later when a reference path is specified
• Fixed bug in IMAP MacRoman to modified UTF7
• Fixed bug where mail to "postmaster" sent without the SMTP SIZE extension could be refused with an account limit error when Expand SMTP Addresses is off
• Added support for RFC 3834 Auto-Submitted headers
• SMTP Server now checks message size before filters
