## Observation Notes for Mrs. Oldaker

February 25, 2014      Time: 2:20 pm-2:50 pm

- Children sitting in large group on the floor, reading words for song from book
- No technology used
- Students have no visuals
- Teacher only sits and tells the students what to do, does not circulate among students
- Tapes and cd's are used for instruction

Upon my meeting with Mrs. Oldaker, I stated that no technology is being used to enhance student learning. The implementation of visuals would assist with instruction. The lesson plans were repetitive with the continued use of tapes and cd's instead of using musical instruments. I also explained to Mrs. Oldaker the need to move around the room during instruction and to enjoy the children.

Mrs. Deborah Starr  
Asst. Principal  
Burch Elementary
