The Burch Elementary School Technology Team met today to discuss the effectiveness of technology implementation in the classroom.

Second grade teacher Jeremy Davis stated that the opening of a second computer lab for the students has been a success. It is used daily by the teachers.

Pam Newsome, fourth grade teacher, suggested to use ipads instead of ipods in the classroom due to teacher monitoring and students working in small groups.

It was also noted that a sync station would be helpful to Mrs. Musgrave to sync her seven ipads quicker.

A concern is to have an accountable way to tracks apps without teachers paying for it out of their pocket. Currently, Ms. Musgrave noted the WVDE will not supply due to not being able to track the iTunes card use.

The committee is pleased that the use of technology is being used daily in the classrooms to enhance student learning.
