Hi! This is an advertisement of really cool software cracking service.

We crack any software, any code.

- We always provide a full-working demo. It's usually a virtual machine (like VMware) to which you can connect remotely and check your software thoroughly.
- You will be able to use crack/keygen/dongle emulator on any computer! It will not be fixed to one computer, run it anywhere!
- Usual cost for any crack/keygen/dongle emulator/other solution is USD 500 (flat fee).
- How fast? No, I can't guarantee it will be ready fast. Since I'm working for quality, I do things slow and reliable.

We do not have email.
Use BitMessage please (https://bitmessage.org/). Our identity there is: BM-2cTzZDkqQc5yCczkxbHoLMz9A6J8SYQG7S
Payment option available is Bitcoin only. This is for your safety as well!
