Jan 16, 2008 - Keyclick 1.2

- Move KeyclickServer.app to be an "auxilliary executable" instead of a bundle resource to avoid possible conflict with Leopard code signing.

Nov 27, 2007 - Keyclick 1.1.9

- Use Leopard SoundServices API in place of SystemSound API when running on Leopard.

If you are upgrading from a previous version, you will need to stop the previous KeyclickServer and then re-enable Keyclick to begin using the new features.

Nov 15, 2007 - Keyclick 1.1.8

- Build with Xcode 3.0 under Leopard for improved compatibility.

Oct 11, 2007 - Keyclick 1.1.7

- Allow editing "global mute" short cut (Control-Option-Command-t).
- Added "Don't click for Arrow keystrokes" option.
- Synchronize event callback versus UI hearbeat to avoid possible timing conflict.
- Save registration data in ~/library if /library is not available (installed for this user only).

Sep 18, 2007 - Keyclick 1.1.6

- Activate or mute all sounds with global hot key combination Control-Alt-Command-T.
- Added "Keyboard Sound" in addition to "Click Key Sound" and "Typewriter Sound".
- Added alternative "Simple Click" mouse sound.
- Restore Keyclick sounds upon wake from sleep.

Aug 14, 2007 - Keyclick 1.1.5

- Defer releasing previous sound actionIDs while sound might still be playing.
- Correct file references to work on case sensitive file systems.
- Use custom icon contributed by Artie Kuhn.
- Add a higher pitched click.

Aug 3, 2007 - Keyclick 1.1.4

- Restrict scroll volume adjustment to 70ms sampling interval for improved stability (avoid possible timing sensitivity in SystemSoundPlay).

Jul 16, 2007 - Keyclick 1.1.3

- Allow visually changing "volume up" and "volume down" shortcuts.
- Extend "Shift Key Tone" to cover all modifiers (Cmd, Option, Control, Shift, Fn), rename to "Modifier Key Tones".
- Make scroll wheel click and mouse click obey Keyclick Exclude/Include list.

Jul 11, 2007 - Keyclick 1.1.2

- Added "Shift Key Tone" button to alter click sound when caps lock or shift is enabled.
- Improved description of setting alternate "volume up" and "volume down" shortcuts.

Jul 3, 2007 - Keyclick 1.1.1

- Added "Do Include vs Exclude" button to allow selecting which applications should click.

Jun 27, 2007 - Keyclick 1.1

- Reload sounds at 5 and 10 seconds after startup to work on some older systems.
- Restructure Keyclick Server to encapsulate event callback.

Jun 13, 2007 - Keyclick 1.0.9

- Added "Don't click for repeated Esc or Arrow keystrokes" option.

Jun 8, 2007 - Keyclick 1.0.8

- Added programmable keyboard shortcuts for louder and softer.
- Revert to Cmd-Shift-(and Cmd-Shift-) as default shortcuts for softer and louder.
- Don't play sounds during wake from sleep for improved stability on some systems.

May 29, 2007 - Keyclick 1.0.7

- Improve volume range of Typewriter sounds.
- Add volume control for Mouse click sound.
- Use Cmd-Shift-Up arrow and Cmd-Shift-Down arrow to adjust keyclick volume for consistency across International keyboards.

Apr 20, 2007 - Keyclick 1.0.6

- Added Keyclick Exclusion list to exclude selected applications from clicking.
- Speed up connect to Keyclick Server, guard against Unselect while trying to connect.
- Price will increase to \$5 after May 15th, 2007.

Mar 26, 2007 - Keyclick 1.0.5

- Added button to show current version and check for update.
- Added tab view with "Basic" and "More Options".
- Added PopUp menu to select between "Click Key Sound" and "Typewriter

Sound".

Mar 5, 2007 - Keyclick 1.0.4

- Added mouse button click for making video recordings of screen actions.
- Reload sounds upon wake from sleep for improved reliability.

Feb 27, 2007 - Keyclick 1.0.3

- Increased range of volume and pitch controls to include Mighty Mouse like subtle feedback.
- Restart Keyclick Server when user authenticates to run it as root.

Feb 21, 2007 - Keyclick 1.0.2

- Changed click sound to be more snap like.
- Added scroll wheel click.
- Fixed bug where Keyclick enable button would remain dimmed after "Enable access for assistive devices" was selected in Universal Access panel.
- Install "Silentium" alert sound so keyclick can be used without enabling other alert sounds.
- Added Localizable.strings
- Fixed bug in disconnecting from Keyclick Server when panel is unselected.

Feb 14, 2007 - Keyclick 1.0.1

- Fix to restore keyclick volume when system is restarted and sound API is not available yet.
- Added "Type here to test settings" field.
- Added MacPAD URL.

Feb 12, 2007 - Keyclick 1.0

- Added pitch control to adjust keyclick tone.
- Update UI and help files.

Feb 8, 2007 - Keyclick 1.0b1

- First public beta.
