Please see the help menu for more information on IPNetSentryX or contact us at:

info@sustworks.com

http://www.sustworks.com/site/sup.html

IPNetSentryX is written in Cocoa using Mac OS X native BSD networking.

Any program of this scale incorporates contributions of many people who worked on the underlying system services and tools. Thank you for lending me your shoulders.

IPNetSentryX uses a Network Kernel Extension (NKE) that includes "Modifications of Original Code subject to the Apple Public Source License." You can obtain a copy of this License at <http://www.apple.com/publicsource>, and a copy of this source code from the sustworks website <ftp://sustworks.com> or by sending email to psichel@sustworks.com .

IPNetSentryX includes AVL Tree library code that requires the following notice which applies specifically to that code:

```
/*
