This application can be distributed freely as long as it's distributed with this ReadMe file and the sample map. This package cannot be placed with bundles and/or CD-ROMs since it's in the development stage. When it gets to the final release, then we'll talk. :)

I make no warranty on this software. Use it at your own risk! This app has been tested and shows to be stable in its current state, but it's only been tested on Power Macs under emulation. I take no responsibility in anything you might lose due to using this software.
