

# Hi Happy People!!!

This is my 3rd PM That I think is cool enough to upload!!!

Thanks for the big response from my last PM. This ones a little different though. ;) Lots of you suggested different things to do that you would like to see on a PM.Well I took the best ideas from you people and put them in!!

1.FIST= Some one wrote me and said, It would be really cool if I had hand grenades! The first trigger will through a long stream of weightless grenades.The second trigger throws missiles affected by gravaty, Excellent surprise to use at the top of the big room in Mars needs Chicks.

2.44 MAG.=Rapid firing hunter bolts. Check it out with 2 guns!!!!!!

3.FUSION PISTOL= Fires trooper bullets. Their spread out just a little so its a great long range weapon. When you charge up, trooper grenades!

4.ASSAULT RIFLE=Normal bullets narrowed down but grenades will come as fast as you can pump'em.

5.FLAME=The first trigger firers normal fire but the second is one of my favorites!!! CRAP! Blind your opponent with pounds of CRAP!

6.SPHINCTER=Fires tons of hunter bolts in tons of directions! Best to use in the arenas, point down and fierand you fly backwards while you're shooting. This can be a pain in the #\$\$%! ^\* to your opponent!

7.ALIEN=Unchanged but lasts longer.

Thank you all who gave me these ideas!

If you like this model, e-mail me and tell me what you think!!

Tell me what you think would be cool in a PM. I'll use the best ideas in my next model!!!!

DEATH TO NONBELIEVERS!!!!!!!!!!!!!!
