

NOTES:

Debug menu:

If you see this menu:

You are running the source code which is ok.

or

You are a user who has received an unsupported copy created from modified source code with this feature enabled.

The debug menu is used by my testers to do various things to stress the application (it also makes testing faster than through normal use).

Game Types:

The Puzzels, Big Pictures and Hidden Words game types are not enabled because of the unacceptable delay it would have caused in the release of this version.

Game Type Editors:

Many of the editors are scheduled to be available in the next release 1.0.0a1.

On several of the test systems Concentration][has crashed under more or less repeatable conditions. The conditions appear to be:

The available A heap space falls to around 200k.

You select Save As Text with the High Scores window in front.

The file name you give the finder causes an older file to be replaced.
