

## **Futurama Screen Saver v1.00**

This is a FREEWARE 32-bit screen saver of the TV series Futurama.

This screen saver will display the main characters from the Futurama TV series randomly upon your screen.

The screen saver has been tested under Windows 95, Windows 98, and Windows NT 4.0 with at least 16 MB. of memory. This program requires 16-bit colour (256 colours will not suffice), since some of the images are high resolution. The images may appear correctly with a screen resolution of 640x480, but the screen saver has only been tested on systems using 800x600 and 1024x768. This screen saver supports password protection for both Windows 95/98 and NT.

To install the screen saver just run SETUP.EXE. To remove the screen saver, simply run the "Add/Remove Programs" applet from within the Control Panel (you should see Futurama Screen Saver listed within).

Futurama, the Futurama theme, and the Futurama images displayed in this screen saver are Trademarked and Copyrighted by 20th. Century Fox and the Curiosity Company.
