

Marilyn Manson Desktop Theme

I got sick of not having enough Marilyn Manson Desktop themes on the net, so I made one myself hoping it's as good as the others out there. Nothing to install, just unzip MaNsOn2.zip into c:\program files\plus!\Themes and choose Marilyn Manson 2 for the theme. I also put in a font if you don't already have it called Gravr.ttf so install it into c:\windows\fonts. This Theme was created by ICEMAN and is for anyone and everyone that likes Marilyn Manson enough to put him on their computer. Tell me what you think from E-MAIL at:
