AOL God-Account Maker 2.0

AOL God Account Maker 2.0 is an application I found from an AOL Home Employee's computer. The program makes master accounts that are not checked by regular AOL maintenance. This is virtually a risk free way of having full access to all aol features.

Making Master Accounts:
To make a AOL Master Account, you must be signed on to AOL. Open the Application, Aol God Account Maker.2, and read the instructions carefully. First it will ask you to enter the screenname and password for the account you want upgraded. The first time you run the program you must use the master screenname. For the upgrade of other screennames, you must have the master screenname upgraded first. The application will then ask you to locate the AOL application. Your screen will now fade to black for 5-6 seconds. When this is done, a message may appear saying message has been sent. Congratulations, you have sent in your request for an AOL God-Account. The host computer will upgrade your account in a day or two of the request.

;-)
