

Props

- MysteryV - You should know why he's here. And if you dorks in Zelifcam don't know who this is, I pity you. Go learn who he is.

-Happy Hardcore - A legend in his own time. Once again, if you don't know why, go find out.

- Ambient - One of the first people to play around with FDOs, plus, the creator of morphing.....you rule me....

- Kip - One of the very first area-makers....along with Ambient and MysteryV...you own me....

- Moneygripp - The "My Message Board" form came from SPiRaL 2.0. Oh yeah, and i borrowed the icon ID too, and looked at it a lot while I was making my area.

- AJ - The idea for the weird windows, which are actually not in this tool.

OJ - Stupid guy. I built my area off of that area you made for Maxx in the TOS Tool. The art IDs conflict, but nobody should notice, since it's impossible to use both of these tools at once.

- Rage AOL - Heh, I'm probably the only person who remembers him, and i was gonna do something to the Display Form DLOG that he did first, but i didn't cuz my art sucked.....oh well...in the next version...

- Freek - Being godlike, and teaching me some of the most important stuff about toolmaking. Oh yeah, if it weren't for you, I would probably still be in Zelifcam acting stupid. Thanks.

- Linear - Teaching me submenus, and some basic stuff about areas. Thanks.

- H20 - Teaching me a small amount of stuff about FDO's. Thanks.

- Myself - Teaching me a shitload of stuff, making this tool, etc.
