

Props

Thanks go to:

- Fibra - Whose IM's off/on forms I stole, and auto room's forms too
- Res - Finding the Submenu's (I have changed mine, so they shouldn't conflict with any from another tool, except maybe TOS Tool)
- Surge - Taught me a LOT about editing forms
- Mystery Vortex - Made the original tool(s) (after AOL did of course)
- Da Chronic - dunno, I just loved AOHell when it worked
- >Oh ya, if you have a copy of WAOL 1.5 or 2.0, please send it to me!
- Tang - I think this started out as one of the MacChat tools
- Sharp - Taught me how to change the ID of a PICT that is displayed, and told me why my tool made all the funny little windows.
