ONLINE GOD TOOLS
Written by TOSGod@anon.penet.fi

Online god tools was written by TOSGod as a way to make the destruction of America Online eaiser.   You can get to all the famous areas, Jade, ARC, and a few other crazy places.   I would really like it if you could send me some lib/rec numbers along with some cool token/data sets you find.   If they are cool, I will add them to the list and I will add your name to the credit list at the bottom of this page.   If there are ANY doubts about false copies of Online God Tools, please write to me with your screen name.   I will find you online.   (Include some stupid codeword in your letter so you will know it's me).

It took me quite a long time to write OGT, so PLEASE do not steal the idea. This program was based on the "Kip & Amb" hack.   I used their listings of areas, renamed them to something understandable, and added the essentials.

This is a wonderful tool to have.   Please, keep it around... :)

Oh, and your second fee for using this, is every time you sign on, you must go into one of the Macwarez rooms, and forward one piece of mail to everyone in the room.   That will get "free trade" going again.
