

New Features in 1.4

Enter Macwarez - This opens a window with a button that takes you directly to the private room "Macwarez."

Random Keyword - This will take you to a completely random keyword! Great if you like to download art or are extremely bored.

Edit Ignored List - You can now create a list of people from who, you do not wish to receive mail from. If one of the people on your ignore list tries to mail you they will receive an error saying "This user is not accepting mail from you."

Edit Mailbox Password - For extra security on your mailbox you can now password protect it! Even if someone discovers your account's password they still will not be able to read your mail.

Refresh SN List - This forces AOL to update your online database with all of the screen names on your account. This way you can check to see if someone else has added screen names to your account.

Delegate Mail - Under the mail menu, you can now have all of your mail automatically forwarded to the screen name of your choice!

Fixed B/W Monitor Compatibility - The minor problems that were caused by using the tool with the computer set to 1-Bit color have been fixed.

New Features in 1.2

Mystery's Clubhouse - The closest I'll come to having a real forum. Check it out for links to all of your favorite places.

Background Updates - Included in this release of the Mystery Tool is Background Updates. With Background Updates, updates to your online database and you online art will no longer tie up your computer! You are now free to switch to other applications while you download new art!

Access to the ARC and MAOL Beta Center - Now under the "Goto" menu you will find 2 new favorite places already added for you ;)

Disable/Enable IMs - Under the "Members" menu you will find two new options for quickly disabling and enabling your IMs.

Online Help - While the original Mystery Tool contained a small help window, 1.2 now has a complete online help section!

Instant Installation - Now by simply double clicking the Mystery Tool while AOL is running, the tool will install!

Ram Doubler Compatibilty - It is now completely safe to use the Mystery Tool with RamDoubler. Anyone attempting to use earlier versions of this tool with RamDoubler should upgrade.
