Note From the Author:

Dear Macintosh User:

Hi! My name is Adam Stein and I'm the author of MacLifeInsurance 2.0! Thanks for taking the time to try out this package. I hope you'll like it.

MacLifeInsurance is an easy to use but powerful package of utilities that will protect your data from system crashes, accidental deletions, power outs, corrupted files, and other Macintosh disasters! But it doesn't stop there! It will also protect your eyes, back, and wrists from computer related injuries. And to save you time, you'll have instant hot key access to an accelerated empty trash command, Finder safe Shutdown, Restart, and Sleep commands. You'll also be able to set the speaker volume instantly, toggle between open applications, and turn File Sharing on and off. We've also included a Macintosh version of the Windows Task Manager—making switching between open applications easier than ever! And of course, you can add instant hot key access to your own favorite files whether they're documents, applications, or control panels.

We're also proud to introduce IGS Platinum—a great value for all Macintosh shareware enthusiasts! It includes registered versions of MacLifeInsurance 2.0, Scrapbook Helper, the System 7 Pack! (4 Mice by MacUser!), System 7 Companion Pack!, File Sharing Toggle, INSTANT Area Code, Biorhythms!, and 6 Months of IGS Monthly (regularly $39.95) all for only $59.95!
